MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

Management is responsible for preparing the consolidated financial statements of ATCO Ltd. (the Company) in accordance with International Financial Reporting Standards, which include amounts based on estimates and judgments. Management is also responsible for the preparation of the Management's Discussion and Analysis and other financial information contained in the Company's Annual Report, and ensures that it is consistent with the consolidated financial statements.

Management has established internal accounting and financial reporting control systems, which are subject to periodic review by the Company's internal auditors, to meet its responsibility for reliable and accurate reporting. Integral to these control systems are a code of ethics and management policies that provide guidance and direction to employees, as well as a system of corporate governance that provides oversight to the Company's operating, reporting and risk management activities.

The consolidated financial statements are approved by the Board of Directors on the recommendation of the Audit & Risk Committee. The Audit & Risk Committee is comprised entirely of independent Directors. The Audit & Risk Committee meets regularly with management and the independent auditors to review significant accounting and financial reporting matters, to assure that management is carrying out its responsibilities and to review and approve the consolidated financial statements.

PricewaterhouseCoopers LLP, our independent auditors, are engaged to perform an audit of the consolidated financial statements and expresses a professional opinion on the results. The Independent Auditor's Report to the Share Owners appears on the following page. PricewaterhouseCoopers LLP have full and independent access to the Audit & Risk Committee and management to discuss their audit and related matters.

Executive Vice President & Chief Financial Officer

February 24, 2021

Independent auditor's report

To the Share Owners of ATCO Ltd.

Our opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of ATCO Ltd. and its subsidiaries (together, the Company) as at December 31, 2020 and 2019, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS).

What we have audited

The Company's consolidated financial statements comprise:

- the consolidated statements of earnings for the years ended December 31, 2020 and 2019;
- the consolidated statements of comprehensive income for the years ended December 31, 2020 and 2019;
- the consolidated balance sheets as at December 31, 2020 and 2019;
- the consolidated statements of changes in equity for the years ended December 31, 2020 and 2019;
- the consolidated statements of cash flows for the years ended December 31, 2020 and 2019; and
- the notes to consolidated financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada. We have fulfilled our other ethical responsibilities in accordance with these requirements.

PricewaterhouseCoopers LLP

111-5th Avenue SW, Suite 3100, Calgary, Alberta, Canada T2P 5L3

T: +1 403 509 7500, F: +1 403 781 1825

"PwC" refers to PricewaterhouseCoopers LLP, an Ontario limited liability partnership.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2020. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How our audit addressed the key audit matter
<p>Assessment of retirement benefit obligations</p> <p><i>Refer to note 14 – Retirement Benefits and note 22 – Significant Judgments, Estimates and Assumptions to the consolidated financial statements.</i></p> <p>The Company maintains registered defined benefit and defined contribution pension plans for most of its employees. It also provides other post-employment benefits for retirees and their dependents. The Company accrues for its obligations under defined benefit pension and other post-employment benefits plans (the retirement benefit obligations). As at December 31, 2020, total accrued benefit obligations were \$3,544 million and the market value of plan assets was \$3,105 million. These balances are presented net on the consolidated balance sheet, resulting in net retirement benefit obligations of \$439 million.</p> <p>In determining the retirement benefit obligations, management consults with independent actuaries when setting the assumptions used to estimate retirement benefit obligations and the cost of providing retirement benefits during the period. The significant assumptions used by management in determining the Company's retirement benefit obligations include discount rate, long-term inflation rate, future compensation rates, health care cost trend rates and life expectancy rates.</p> <p>We determined that this is a key audit matter due to the significance of the retirement benefit obligations and the significant judgment made by management in estimating the Company's retirement benefit obligations. In addition, our audit effort involved the use of professionals with specialized skill and knowledge in the field of actuarial services.</p>	<p>Our approach to addressing the matter involved the following procedures, among others:</p> <ul style="list-style-type: none"> • Tested how management determined the retirement benefit obligations, which includes: <ul style="list-style-type: none"> – Utilized a professional with specialized skills and knowledge in the field of actuarial services, who assisted in testing management's process for estimating the total accrued benefit obligations, appropriateness of the methodology, and assessed the reasonableness of management's assumptions such as discount rate, long-term inflation rates, future compensation rates, healthcare costs trend rates and life expectancy rates. – Tested the underlying data used in the determination of retirement benefit obligations. – The work of management's independent actuaries was used in performing the procedures to evaluate the reasonableness of the retirement benefit obligations. As a basis for using this work, management's independent actuaries' competence, capability and objectivity were evaluated, their work performed was understood and the appropriateness of their work as audit evidence was evaluated by considering the relevance and reasonableness of the assumptions, methods and findings. • Tested disclosures related to the sensitivity assumptions used in estimating retirement benefit obligations.

Key audit matter

Assessment of unbilled revenue related to Utilities segment

Refer to note 4 – Revenues and note 22 – Significant Judgments, Estimates and Assumptions to the consolidated financial statements.

The Company had \$132 million of unbilled revenue related to Utilities segment as at December 31, 2020.

The revenue recognized by the Company includes an estimate of consumption by customers of natural gas and electricity that has not yet been billed (unbilled revenue).

The estimate is derived from unbilled gas and electricity distribution services supplied to customers and is based on historical consumption patterns. Management applies judgment to the measure and value of the estimated consumption.

We determined that this is a key audit matter due to (i) the significance of the unbilled revenue; (ii) the judgment applied by management to estimate the consumption; and (iii) the significant auditor effort in performing procedures to test the estimated amount of unbilled revenue.

How our audit addressed the key audit matter

Our approach to addressing the matter included the following procedures, among others:

- Tested the reasonableness of the estimate of unbilled revenue through evidence obtained from events occurring up to the date of the auditor's report, which includes the following:
 - Tested a sample of billings made after December 31, 2020 and compared the relevant amounts of these billings to the corresponding estimate of unbilled revenue recorded.
 - Agreed the pricing applied to the sample of billings to the externally published rates.
- Tested the operating effectiveness of internal controls relating to billed and unbilled revenue, including information technology (IT) general controls of the relevant IT systems that management uses for meter readings and billings.

Other information

Management is responsible for the other information. The other information comprises the Management's Discussion and Analysis, which we obtained prior to the date of this auditor's report and the information, other than the consolidated financial statements and our auditor's report thereon, included in the annual report, which is expected to be made available to us after that date.

Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express an opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard. When we read the information, other than the consolidated financial statements and our auditor's report thereon, included in the annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Shannon Ryhorchuk.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2020

(Tabular amounts in millions of Canadian Dollars, except as otherwise noted)

1. THE COMPANY AND ITS OPERATIONS

ATCO Ltd. was incorporated under the laws of the province of Alberta and is listed on the Toronto Stock Exchange. Its head office and registered office is at 4th Floor, West Building, 5302 Forand Street SW, Calgary, Alberta T3E 8B4. ATCO Ltd. is controlled by Sentgraf Enterprises Ltd. and its controlling share owner, the Southern family.

ATCO Ltd. is engaged in the following business activities:

- Structures & Logistics (workforce and residential housing, innovative modular facilities, construction, site support services, workforce lodging services, facility operations and maintenance, defence operations services, and disaster and emergency management services);
- Canadian Utilities Limited, including:
 - Utilities (electricity and natural gas transmission and distribution and international electricity operations);
 - Energy Infrastructure (electricity generation, energy storage and industrial water solutions);
 - Retail Energy (electricity and natural gas retail sales) (included in the Corporate & Other segment); and
- Neltume Ports (ports and transportation logistics) (see Note 24).

The consolidated financial statements include the accounts of ATCO Ltd. and its subsidiaries (see Note 25). The statements also include the accounts of a proportionate share of the Company's investments in joint operations, its equity-accounted investments in joint ventures (see Note 26) and its equity-accounted investment in associate company (see Note 24). In these financial statements, "the Company" means ATCO Ltd., its subsidiaries, joint arrangements and the associate company.

2. BASIS OF PRESENTATION

STATEMENT OF COMPLIANCE

The consolidated financial statements are prepared according to International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and interpretations of the IFRS Interpretations Committee (IFRIC).

The Board of Directors (Board) authorized these consolidated financial statements for issue on February 24, 2021.

BASIS OF MEASUREMENT

The consolidated financial statements are prepared on a historic cost basis, except for derivative financial instruments, retirement benefit obligations and cash-settled share-based compensation liabilities which are carried at remeasured amounts or fair value. The Company's significant accounting policies are described in Note 32.

Certain comparative figures have been reclassified to conform to the current presentation.

FUNCTIONAL AND PRESENTATION CURRENCY

The consolidated financial statements are presented in Canadian dollars. Each entity within the Company determines its own functional currency based on the primary economic environment in which it operates.

USE OF JUDGMENTS AND ESTIMATES

Management makes judgments and estimates that could significantly affect how policies are applied, amounts in the consolidated financial statements are reported, and contingent assets and liabilities are disclosed. Most often these judgments and estimates concern matters that are inherently complex and uncertain. Judgments and estimates are reviewed on an on-going basis; changes to accounting estimates are recognized prospectively. The significant judgments, estimates and assumptions are described in Note 22.

3. SEGMENTED INFORMATION

The Company's operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (CODM). The CODM is comprised of the Chair and Chief Executive Officer, and the other members of the Executive Committee.

The Accounting policies applied by the segments are the same as those applied by the Company, except for those used in the calculation of adjusted earnings. Intersegment transactions are measured at the exchange amount, as agreed to by the related parties.

In 2020, the Company reorganized its operating subsidiaries into the following segments:

- Structures & Logistics;
- Utilities (Electricity and Natural Gas);
- Energy Infrastructure;
- Neltume Ports; and
- Corporate & Other.

Comparative amounts for prior periods have been restated to reflect the realigned segments. Management has determined that the operating subsidiaries in the reportable segments below share similar economic characteristics, as such, they have been aggregated.

The descriptions and principal operating activities of the realigned reportable segments are as follows:

Structures & Logistics		The Structures & Logistics segment includes ATCO Structures & Logistics. This company offers workforce and residential housing, innovative modular facilities, construction, site support services, workforce lodging services, facility operations and maintenance, defence operations services, and disaster and emergency management services.	
Canadian Utilities Limited	Utilities	Electricity	The Utilities (Electricity) segment includes ATCO Electric, which provides regulated electricity transmission and distribution services in northern and central east Alberta, the Yukon and the Northwest Territories and the Company's 50 per cent ownership interest in LUMA Energy LLC which provides international electricity operations (see Note 26).
		Natural Gas	The Utilities (Natural Gas) segment includes ATCO Gas, ATCO Pipelines and ATCO Gas Australia. These businesses provide integrated natural gas transmission and distribution services throughout Alberta, in the Lloydminster area of Saskatchewan and in Western Australia.
	Energy Infrastructure		The Energy Infrastructure segment includes ATCO Power (2010) (in 2019, the Company sold its Canadian fossil fuel-based electricity generation business), Alberta PowerLine (before sale in 2019), ATCO Energy Solutions and ATCO Power Australia. Together these businesses provide electricity generation, natural gas storage, industrial water solutions and related infrastructure development throughout Alberta, the Yukon, the Northwest Territories, Australia, Mexico and Chile.
	Corporate & Other		Canadian Utilities Limited Corporate & Other includes intersegment eliminations and ATCO Energy, a retail electricity and natural gas business in Alberta.
Neltume Ports		The Neltume Ports segment includes the equity interest in Neltume Ports S.A., a leading port operator and developer in South America. Neltume Ports operates sixteen port facilities and three port operation services businesses located in Chile, Uruguay, Argentina and Brazil.	
Corporate & Other		ATCO Corporate & Other includes commercial real estate owned by the Company and intersegment eliminations.	

Results by operating segment for the year ended December 31 are shown below.

(1) Other assets exclude financial instruments, deferred income tax assets and goodwill.

ADJUSTED EARNINGS

Adjusted earnings are earnings attributable to Class I and II Shares after adjusting for:

- the timing of revenues and expenses for rate-regulated activities;
- one-time gains and losses;
- unrealized gains and losses on mark-to-market forward and swap commodity contracts;
- significant impairments; and
- items that are not in the normal course of business or a result of day-to-day operations.

Adjusted earnings are a key measure of segment earnings used by the CODM to assess segment performance and allocate resources. Other accounts in the consolidated financial statements have not been adjusted as they are not used by the CODM for those purposes.

The reconciliation of adjusted earnings and earnings for the year ended December 31 is shown below.

Early termination of the master service agreement for managed IT services

On December 31, 2020, the Company signed a Master Services Agreement (MSA) with IBM Canada Ltd. (IBM) to provide managed information technology (IT) services. These services are currently provided by Wipro Ltd. (Wipro) under a ten-year MSA expiring December 2024. The transition of the managed IT services from Wipro to IBM will be completed over a six-month period, which commenced February 1, 2021.

On December 31, 2020, the Company recognized an onerous contract provision of \$75 million (\$32 million after-tax and non-controlling interests (NCI)), which represents management's best estimate of the costs to exit the Wipro MSA. The provision is included in provisions and other current liabilities in the consolidated balance sheets and other expenses in the consolidated statements of earnings. The actual costs will be finalized later in 2021. The onerous contract provision is not in the normal course of business and has been excluded from adjusted earnings.

Gain on sale of operations

In 2019, the Company closed a series of transactions related to the sale of its Canadian fossil fuel-based electricity generation business and Alberta PowerLine (see Note 23). These sales resulted in an aggregate gain of \$174 million (\$65 million after-tax and NCI). As the gain was related to a series of one-time transactions, it was excluded from adjusted earnings.

Impairment and other costs

In 2020, impairment (see Note 10) and other costs not in the normal course of business of \$20 million, after tax and NCI, were recorded. These costs mainly relate to certain assets that no longer represent strategic value to the Company.

Canadian Utilities' subsidiary ATCO Oil & Gas Ltd. holds a five per cent working interest in oil and gas assets in Northern Canada. With continued low oil prices and the COVID-19 pandemic continuing to cause economic uncertainty, an impairment of \$9 million was recorded in the second quarter of 2020 reflecting the reduced likelihood of future recovery of these costs.

ATCO Structures & Logistics Ltd. closed its manufacturing facility located in Pocatello, Idaho, relocated materials and equipment to its manufacturing facilities in Calgary, Alberta and Diboll, Texas and recorded \$3 million in one-time closure costs in the second quarter of 2020.

The remaining costs mainly relate to the continued transformation and realignment of certain functions in the Company, as well as an adjustment to certain real estate assets in small markets within the Company's real estate portfolio due to continued low prices and economic uncertainty.

Unrealized gains and losses on mark-to-market forward and swap commodity contracts

The Company's retail electricity and natural gas business in Alberta enters into fixed-price swap commodity contracts to manage exposure to electricity and natural gas prices and volumes. Prior to the sale of the Canadian fossil fuel-based electricity generation business in the third quarter of 2019, these contracts were accounted for as normal purchase agreements as they were with an affiliate company and the own use exemption was applied. Starting September 30, 2019, these contracts are measured at fair value because the contracts are with a third party and the own use exemption no longer applies.

Unrealized gains and losses due to changes in the fair value of the fixed-price swap commodity contracts are recognized in the earnings of the Corporate & Other segment of Canadian Utilities Limited.

Additionally, prior to the sale of the Canadian fossil fuel-based electricity generation business in the third quarter of 2019, the Company entered into forward contracts in order to optimize available merchant capacity and manage exposure to electricity market price movements for its Independent Power and Thermal Plants not governed by a Power Purchase Arrangement. The forward contracts were measured at fair value. Unrealized gains and losses due to changes in the fair value of the forward contracts were recognized in the earnings of the Energy Infrastructure operating segment where hedge accounting was not applied.

The CODM believes that removal of the unrealized gains or losses on mark-to-market forward and swap commodity contracts provides a better representation of operating results for the Company's operations.

Realized gains or losses are recognized in adjusted earnings when the commodity contracts are settled.

Rate-regulated activities

ATCO Electric and its subsidiaries, ATCO Electric Yukon, Northland Utilities (NWT) and Northland Utilities (Yellowknife), as well as ATCO Gas, ATCO Pipelines and ATCO Gas Australia are collectively referred to as the Utilities.

There is currently no specific guidance under IFRS for rate-regulated entities that the Company is eligible to adopt. In the absence of this guidance, the Utilities do not recognize assets and liabilities from rate-regulated activities as may be directed by regulatory decisions. Instead, the Utilities recognize revenues in earnings when amounts are billed to customers, consistent with the regulator-approved rate design. Operating costs and expenses are recorded when incurred. Costs incurred in constructing an asset that meet the asset recognition criteria are included in the related property, plant and equipment or intangible asset.

The Company uses standards issued by the Financial Accounting Standards Board (FASB) in the United States as another source of generally accepted accounting principles to account for rate-regulated activities in its internal reporting provided to the CODM. The CODM believes that earnings presented in accordance with the FASB standards are a better representation of the operating results of the Company's rate-regulated activities. Therefore, the Company presents adjusted earnings as part of its segmented disclosures on this basis. Rate-regulated accounting (RRA) standards impact the timing of how certain revenues and expenses are recognized when compared to non-rate regulated activities, to appropriately reflect the economic impact of a regulator's decisions on revenues.

Rate-regulated accounting differs from IFRS in the following ways:

Timing Adjustment	Items	RRA Treatment	IFRS Treatment
1. Additional revenues billed in current period	Future removal and site restoration costs, and impact of colder temperatures.	The Company defers the recognition of cash received in advance of future expenditures.	The Company recognizes revenues when amounts are billed to customers and costs when they are incurred.
2. Revenues to be billed in future periods	Deferred income taxes, impact of warmer temperatures, and impact of inflation on rate base.	The Company recognizes revenues associated with recoverable costs in advance of future billings to customers.	The Company recognizes costs when they are incurred, but does not recognize their recovery until customer rates are changed and amounts are collected through future billings.
3. Regulatory decisions received	Regulatory decisions received which relate to current and prior periods.	The Company recognizes the earnings from a regulatory decision pertaining to current and prior periods when the decision is received.	The Company does not recognize earnings from a regulatory decision when it is received as regulatory assets and liabilities are not recorded under IFRS.
4. Settlement of regulatory decisions and other items	Settlement of amounts receivable or payable to customers and other items.	The Company recognizes the amount receivable or payable to customers as a reduction in its regulatory assets and liabilities when collected or refunded through future billings.	The Company recognizes earnings when customer rates are changed and amounts are recovered or refunded to customers through future billings.

For the year ended December 31, the significant timing adjustments as a result of the differences between rate-regulated accounting and IFRS are as follows:

	2020	2019
<i>Additional revenues billed in current period</i>		
Future removal and site restoration costs ⁽¹⁾	41	34
Impact of colder temperatures ⁽²⁾	1	7
<i>Revenues to be billed in future periods</i>		
Deferred income taxes ⁽³⁾	(55)	(54)
Deferred income taxes due to decrease in provincial corporate income tax ⁽⁴⁾	-	106
Impact of inflation on rate base ⁽⁵⁾	(3)	(7)
<i>Regulatory decisions received (see below)</i>	-	3
<i>Settlement of regulatory decisions and other items</i> ⁽⁶⁾	(16)	9
	(32)	98

(1) Removal and site restoration costs are billed to customers over the estimated useful life of the related assets based on forecast costs to be incurred in future periods.

(2) ATCO Gas' customer rates are based on a forecast of normal temperatures. Fluctuations in temperatures may result in more or less revenue being recovered from customers than forecast. Revenues above or below the normal in the current period are refunded to or recovered from customers in future periods.

(3) Income taxes are billed to customers when paid by the Company.

(4) In 2019, the Government of Alberta enacted a phased decrease in the provincial corporate income tax rate from 12 per cent to 8 per cent. This decrease was phased in increments from July 1, 2019 (see Note 7). As a result of this change, the Alberta Utilities decreased deferred income taxes and increased earnings in 2019 by \$106 million.

(5) The inflation-indexed portion of ATCO Gas Australia's rate base is billed to customers through the recovery of depreciation in subsequent periods based on the actual or forecasted annual rate of inflation. Under rate-regulated accounting, revenue is recognized in the current period for the inflation component of rate base when it is earned. Differences between the amounts earned and the amounts billed to customers are deferred and recognized in revenues over the service life of the related assets.

(6) In 2020, ATCO Electric Distribution recorded a decrease in earnings of \$14 million related to payments to customers for transmission costs and capital related items.

Regulatory decisions received

Under rate-regulated accounting, the Company recognizes earnings from a regulatory decision pertaining to current and prior periods when the decision is received. A description of the significant regulatory decisions recognized in adjusted earnings in 2019 is provided below.

Decision	Amount	Description
1. Information Technology (IT) Common Matters	12	<p>In August 2014, the Company sold its IT services business to Wipro Ltd. (Wipro) and signed a ten-year IT Master Services Agreement (MSA) effective January 1, 2015.</p> <p>In 2015, the Alberta Utilities Commission (AUC) commenced an Information Technology Common Matters proceeding to review the recovery of IT costs by the Alberta Utilities from January 1, 2015 going forward. On June 5, 2019, the AUC issued its decision regarding the IT Common Matters proceeding and directed the Alberta Utilities to reduce the first-year of the Wipro MSA by 13 per cent and to apply a glide path that reduces pricing by 4.61 per cent in each of years 2 through 10. The reduction in adjusted earnings resulting from the decision for the period January 1, 2015 to December 31, 2019 was \$12 million.</p>
2. ATCO Electric Transmission General Tariff Application (GTA)	(9)	<p>In June 2017, ATCO Electric Transmission filed a GTA for its operations for 2018 and 2019. The decision was received in July 2019 approving the majority of capital expenditures and operating costs requested. The increase in adjusted earnings resulting from the decision of \$9 million was recorded in 2019.</p>

IT Common Matters decision

Consistent with the treatment of the gain on sale in 2014 from the IT services business by the Company, financial impacts associated with the IT Common Matters decision are excluded from adjusted earnings. The amount excluded from adjusted earnings for the year ended December 31, 2020 was \$10 million (2019 - \$12 million).

Other

The Company adjusts the deferred tax asset which was recognized as a result of the 2015 Tula Pipeline Project impairment. During the year ended December 31, 2020, the Company recorded a foreign exchange loss of \$2 million after tax and NCI (2019 - \$nil) due to a difference between the tax base currency, which is the Mexican peso, and the US dollar functional currency.

For the year ended December 31, 2019, the Company recognized costs of \$6 million after tax and NCI with regard to a number of disputes related to the Tula Pipeline project. The Company continues to work with the involved parties to achieve a resolution of these disputes. As these costs related to a significant non-recurring event, they were excluded from adjusted earnings.

4. REVENUES

The Company disaggregates revenues based on the nature of revenue streams. The disaggregation of revenues by each operating segment for year ended December 31 is shown below:

	2020		2019			Energy Infrastructure	Corporate & Other ⁽²⁾	Consolidated

	801	1,390	1,520	2,910	2,910	824	171	4,706

(1) For the year ended December 31, 2020, Electricity and Natural Gas segments include \$132 million of unbilled revenue (2019 - \$130 million). At December 31, 2020, \$132 million of the unbilled trade accounts receivables are included in trade accounts receivable and contract assets (2019 - \$130 million).

(2) Includes revenues from the Corporate & Other in Canadian Utilities Limited and ATCO Ltd.

Remaining performance obligations

The Company is party to performance obligations, which have a duration of more than one year, are not subject to the Right-to-Invoice practical expedient, and do not include variable consideration which is constrained (remaining performance obligations). At December 31, 2020, the most significant remaining performance obligations are as follows:

- (i) the Company's 35-year service agreement to operate Fort McMurray 500 kV Transmission project that amounts to \$0.8 billion. The Company expects that approximately 2 per cent of the amount will be recognized as revenue during the year ending December 31, 2021, subject to satisfaction of related performance obligations;
- (ii) provision of storage and industrial water services over the life of a contract that in aggregate approximates \$0.3 billion. The Company expects that approximately 7 per cent of the amount will be recognized as revenue during the year ending December 31, 2021; and
- (iii) manufacturing of transportable workforce housing and space rental products under the terms of fixed price contracts that in aggregate approximates \$0.3 billion. The Company expects that approximately 95 per cent will be recognized as revenue during the year ending December 31, 2021.

5. OTHER COSTS AND EXPENSES

Other costs and expenses include costs related to early termination of the master service agreement for managed information technology services (see Note 3), rent, gains and losses on derivative financial instruments, goods and services such as professional fees, contractor costs, technology related expenses, advertising, and other general and administrative expenses.

6. INTEREST EXPENSE

Interest expense primarily arises from interest on long-term debentures. The components of interest expense are summarized below.

	2020	2019
Long-term debt	413	427
Non-recourse long-term debt	-	57
Retirement benefits net interest expense	14	18
Amortization of deferred financing charges	3	5
Short-term debt	1	6
Interest expense on lease liabilities (Note 16)	3	3
Other	4	11
	438	527
Less: interest capitalized (Notes 10, 11)	(13)	(16)
	425	511

Borrowing costs capitalized to property, plant and equipment during 2020 were calculated by applying a weighted average interest rate of 4.45 per cent (2019 - 4.54 per cent) to expenditures on qualifying assets.

7. INCOME TAXES

IMPACT OF CHANGE IN INCOME TAX RATE

On May 28, 2019, the Alberta government passed Bill 3, the Job Creation Tax Cut (Bill 3), which reduces the Alberta provincial corporate tax rate from 12.0 per cent to 8.0 per cent in a phased approach between July 1, 2019 and January 1, 2022. As a result of this change, in 2019, the Company recorded an adjustment to current and deferred income taxes of \$1 million and \$210 million, respectively.

On October 20, 2020, Bill 35, Tax Statutes (Creating Jobs and Driving Innovation) (Bill 35) received first reading in the legislative assembly of Alberta and became substantively enacted for financial reporting purposes. The Bill received Royal Assent on December 9, 2020. Bill 35 accelerated the reduction of the Alberta provincial corporate tax rate, which was previously announced in Bill 3, to 8.0 per cent on July 1, 2020. The financial impact of this change is not significant.

The income tax rate for 2020 is 24.0 per cent (2019 - 26.5 per cent).

INCOME TAX EXPENSE

The components of income tax expense for the year ended December 31 are summarized below.

	2020	2019
Current income tax expense		
Canada	40	80
Australia	(10)	(5)
United States	10	(2)
Mexico	3	2
Change in income taxes resulting from decrease in provincial corporate tax rate	-	(1)
Adjustment in respect of prior years	(4)	3
	39	77
Deferred income tax expense		
Reversal of temporary differences	119	203
Change in income taxes resulting from decrease in provincial corporate tax rate	5	(210)
Adjustment in respect of prior years	3	(4)
	127	(11)
	166	66

The reconciliation of statutory and effective income tax expense is as follows:

	2020		2019	
Earnings before income taxes	663	%	1,073	%
Income taxes, at statutory rates	159	24.0	284	26.5
Change in income taxes resulting from decrease in provincial corporate tax rate	5	0.8	(211)	(19.7)
Statutory and deferred tax rate variance	(4)	(0.6)	(8)	(0.8)
Equity earnings	(8)	(1.2)	(7)	(0.7)
Unrecognized deferred income tax assets	12	1.8	6	0.6
Non-taxable gains	-	-	(2)	(0.2)
Tax cost of preferred share financings	5	0.8	2	0.2
Other	(3)	(0.6)	2	0.2
	166	25.0	66	6.1

INCOME TAX ASSETS AND LIABILITIES

Income tax assets and liabilities in the consolidated balance sheet at December 31 are summarized below.

Balance Sheet Presentation		2020	2019
Income tax assets			
Current	Prepaid expenses and other current assets	47	33
Deferred	Deferred income tax assets	85	83
		132	116
Income tax liabilities			
Current	Provisions and other current liabilities	37	12
Deferred	Deferred income tax liabilities	1,443	1,319
		1,480	1,331

DEFERRED INCOME TAXES

The changes in deferred income tax assets are as follows:

Movements	Property, Plant and Equipment	Intangibles	Reserves	Tax Loss Carry Forwards and Tax Credits	Retirement Benefit Obligations	Other	Total
December 31, 2018	(6)	(7)	38	50	8	2	85
(Charge) credit to earnings	(10)	3	1	23	2	3	22
Credit to other comprehensive income	-	-	-	-	15	-	15
Change in income taxes resulting from decrease in provincial corporate tax rate	1	1	(2)	(4)	-	(1)	(5)
Business combinations (Note 23)	7	1	(33)	-	(7)	-	(32)
Foreign exchange adjustment	(1)	-	-	-	-	-	(1)
Other	-	-	-	-	-	(1)	(1)
December 31, 2019	(9)	(2)	4	69	18	3	83
Credit (charge) to earnings	20	1	(4)	(13)	(6)	2	-
Charge to other comprehensive income	-	-	(1)	-	-	-	(1)
Business combinations	-	-	-	1	-	-	1
Foreign exchange adjustment	-	-	-	-	-	1	1
Other	-	-	-	-	-	1	1
December 31, 2020	11	(1)	(1)	57	12	7	85

The Company does not expect any deferred income tax assets to reverse within the next twelve months (2019 - \$7 million).

The changes in deferred income tax liabilities are as follows:

Movements	Property, Plant and Equipment	Intangibles	Reserves	Tax Loss Carry Forwards and Tax Credits	Retirement Benefit Obligations	Other	Total
December 31, 2018	1,540	121	(48)	(108)	(137)	31	1,399
Charge (credit) to earnings	223	(4)	(22)	15	8	1	221
Charge (credit) to other comprehensive income	-	-	4	-	1	-	5
Change in income taxes resulting from decrease in provincial corporate tax rate	(220)	(18)	6	6	15	(4)	(215)
Business combinations (Note 23)	(109)	(2)	46	4	(14)	(14)	(89)
Foreign exchange adjustment	(4)	-	-	-	-	-	(4)
Other	-	-	-	-	-	2	2
December 31, 2019	1,430	97	(14)	(83)	(127)	16	1,319
Charge (credit) to earnings	190	9	(12)	(20)	(10)	(35)	122
Charge (credit) to other comprehensive income	-	-	(7)	-	-	-	(7)
Change in income taxes resulting from decrease in provincial corporate tax rate	-	-	-	5	-	-	5
Foreign exchange adjustment	4	-	-	1	-	(2)	3
Other	-	-	-	-	-	1	1
December 31, 2020	1,624	106	(33)	(97)	(137)	(20)	1,443

The Company does not expect any of its deferred income tax liabilities to reverse within the next twelve months.

At December 31, 2020, the Company had \$628 million of non-capital tax losses and credits which expire between 2024 and 2040 and \$85 million of tax losses which do not expire. The Company recognized deferred income tax assets of \$154 million for these losses and credits.

The Company had \$125 million of aggregate temporary differences for investments in subsidiaries, branches and joint ventures for which deferred income tax liabilities were not recognized (2019 - \$122 million). The Company had \$87 million of aggregate temporary differences for which no deferred tax assets were recognized (2019 - \$45 million).

8. EARNINGS PER SHARE

Earnings per Class I Non-Voting (Class I) and Class II Voting (Class II) Share are calculated by dividing the earnings attributable to Class I and Class II Shares by the weighted average shares outstanding. Diluted earnings per share are calculated using the treasury stock method, which reflects the potential exercise of stock options and vesting of shares under the Company's mid-term incentive plan (MTIP) on the weighted average Class I and Class II Shares outstanding.

The earnings and average number of shares used to calculate earnings per share for the year ended December 31 are as follows:

	2020	2019
Average shares		
Weighted average shares outstanding	114,396,312	114,369,909
Effect of dilutive stock options	50,697	47,937
Effect of dilutive MTIP	265,547	327,978
Weighted average dilutive shares outstanding	114,712,556	114,745,824
Earnings for earnings per share calculation		
Earnings for the year	497	1,007
Non-controlling interests	(245)	(494)
Earnings attributable to Class I and Class II Shares	252	513
Earnings and diluted earnings per Class I and Class II Share		
Earnings per Class I and Class II Share	\$2.21	\$4.49
Diluted earnings per Class I and Class II Share	\$2.20	\$4.47

9. INVENTORIES

Inventories at December 31 are comprised of:

	2020	2019
Natural gas and fuel in storage	20	21
Raw materials and consumables	38	29
Work-in-progress	15	10
Finished goods	3	4
	76	64

For the year ended December 31, 2020, inventories of \$256 million were used in operations and expensed (2019 - \$341 million).

Inventories with a carrying value of \$11 million were pledged as security for liabilities at December 31, 2020 (2019 - \$10 million).

10. PROPERTY, PLANT AND EQUIPMENT

A reconciliation of the changes in the carrying amount of property, plant and equipment is as follows:

	Utility Transmission & Distribution	Electricity Generation	Land and Buildings	Construction Work-in- Progress	Other	Total
Cost						
December 31, 2018	19,315	1,950	1,007	670	1,683	24,625
Additions	53	11	4	1,095	40	1,203
Transfers	874	10	13	(971)	74	-
Retirements and disposals	(87)	(27)	(15)	(15)	(55)	(199)
Sale of operations (Note 23)	-	(1,801)	(13)	(21)	(21)	(1,856)
Foreign exchange rate adjustment	(72)	(1)	-	(10)	(24)	(107)
December 31, 2019	20,083	142	996	748	1,697	23,666
Additions	46	5	2	823	98	974
Transfers	855	-	7	(922)	60	-
Retirements and disposals	(75)	(1)	(18)	-	(95)	(189)
Acquisition of ATCO Sabinco (Note 26)	-	-	7	-	36	43
Changes to asset retirement costs	1	-	-	-	(2)	(1)
Foreign exchange rate adjustment	94	(6)	4	(2)	10	100
December 31, 2020	21,004	140	998	647	1,804	24,593
Accumulated depreciation						
December 31, 2018	4,384	1,338	201	83	754	6,760
Depreciation	434	32	25	-	92	583
Retirements and disposals	(86)	(18)	(15)	-	(41)	(160)
Sale of operations (Note 23)	-	(1,335)	-	-	(13)	(1,348)
Foreign exchange rate adjustment	(12)	-	1	(4)	(11)	(26)
December 31, 2019	4,720	17	212	79	781	5,809
Depreciation and impairment	455	2	21	-	124	602
Retirements and disposals	(75)	-	(18)	-	(75)	(168)
Foreign exchange rate adjustment	19	(1)	1	(1)	5	23
December 31, 2020	5,119	18	216	78	835	6,266
Net book value						
December 31, 2019	15,363	125	784	669	916	17,857
December 31, 2020	15,885	122	782	569	969	18,327

The additions to property, plant and equipment included \$13 million of interest capitalized during construction for the year ended December 31, 2020 (2019 - \$15 million).

Property, plant and equipment with a carrying value of \$343 million were pledged as security for liabilities at December 31, 2020 (2019 - \$274 million).

IMPAIRMENT

Canadian Utilities Limited - Corporate & Other Segment

ATCO Oil & Gas Ltd., a subsidiary of Canadian Utilities Limited, holds a five per cent working interest in oil and gas assets in Northern Canada. With the continued lower oil prices and the COVID-19 pandemic continuing to cause economic uncertainty (see Note 20), the Company determined that the total net book value of these assets was not recoverable due to reduced likelihood of future development of the assets, and, therefore, impaired these assets in full, recognizing an impairment of \$9 million, after tax and NCI. The impairment was included in depreciation, amortization and impairment expense. After recognizing the impairment, the recoverable amount of these assets was nil.

PIONEER NATURAL GAS PIPELINE ACQUISITION

Utilities Segment

On September 30, 2020, ATCO Gas and Pipelines Ltd., a wholly owned subsidiary of CU Inc., entered into an agreement to acquire the 130 km Pioneer Pipeline from Tidewater Midstream & Infrastructure Ltd. and its partner TransAlta Corporation for a purchase price of \$255 million.

NOVA Gas Transmission Ltd. (NGTL) and ATCO Gas and Pipelines Ltd. subsequently agreed that, consistent with the geographic footprints defined in their Integration Agreement, ATCO Gas and Pipelines Ltd. would subsequently transfer to NGTL the approximately 30 km segment of the Pioneer Pipeline located in the NGTL footprint for approximately \$63 million. ATCO Gas and Pipelines Ltd. will retain ownership and continue to operate the portion of the Pioneer Pipeline located in the its footprint.

The transaction is subject to satisfaction of customary conditions, including regulatory approvals by the Alberta Utilities Commission and the Alberta Energy Regulator, which are expected in the second quarter of 2021.

11. INTANGIBLES

Intangible assets consist mainly of computer software not directly attributable to the operation of property, plant and equipment and land rights. Goodwill is also an intangible asset. A reconciliation of the changes in the carrying amount of intangible assets is as follows:

	Computer Software	Land Rights	Work-in-Progress	Other	Total
Cost					
December 31, 2018	656	364	80	74	1,174
Additions	8	-	60	-	68
Transfers	39	19	(59)	1	-
Sale of operations (Note 23)	(25)	-	-	(10)	(35)
Retirements	(117)	-	-	(2)	(119)
Foreign exchange rate adjustment	(1)	-	-	-	(1)
December 31, 2019	560	383	81	63	1,087
Additions	1	-	88	1	90
Transfers	58	24	(82)	-	-
Retirements	(177)	-	-	(2)	(179)
Foreign exchange rate adjustment	1	-	-	-	1
December 31, 2020	443	407	87	62	999
Accumulated amortization					
December 31, 2018	442	48	-	12	502
Amortization	51	5	-	2	58
Sale of operations (Note 23)	(15)	-	-	(2)	(17)
Retirements	(117)	-	-	-	(117)
Foreign exchange rate adjustment	(1)	-	-	-	(1)
December 31, 2019	360	53	-	12	425
Amortization	53	7	-	4	64
Retirements	(176)	-	-	-	(176)
Foreign exchange rate adjustment	1	-	-	-	1
December 31, 2020	238	60	-	16	314
Net book value					
December 31, 2019	200	330	81	51	662
December 31, 2020	205	347	87	46	685

The additions to intangibles include interest capitalized during construction of nil for the year ended December 31, 2020 (2019 - \$1 million).

12. GOODWILL

The carrying value of goodwill for the Utilities and Structures & Logistics segments is shown below.

	2020	2019
Utilities, Electricity	47	47
Utilities, Natural gas	33	33
Structures & Logistics	2	2
Carrying value	82	82

The recoverable amount of goodwill is measured based on each segment's fair value less costs of disposal, which is calculated using publicly available enterprise values and price-to-earnings multiples of comparable, actively traded companies. Each segment's fair value less costs of disposal is compared to its carrying value and is sufficient to support the carrying value of allocated goodwill.

The Company used an average enterprise value-to-earnings before interest, taxes, depreciation, and amortization of 11.5 and 9.8 (2019 - 11.8 and 13.6) and price-to-earnings value of 17.0 and 13.3 (2019 - 19.6 and 16.3) for the Electricity and Pipelines & Liquids segments, respectively, to calculate fair value less costs of disposal.

The fair value measurements are categorized in Level 3 of the fair value hierarchy.

13. LONG-TERM DEBT

Long-term debt outstanding at December 31 is as follows:

	Effective Interest Rate	2020	2019
CU Inc. debentures - unsecured ⁽¹⁾	4.487% (2019 - 4.616%)	8,140	8,090
CU Inc. other long-term obligation, due June 2022 - unsecured ⁽²⁾	2.45% (2019 - 3.95%)	6	6
Canadian Utilities Limited debentures - unsecured, 3.122%, due November 2022	3.187%	200	200
AICU Power Australia credit facility, payable in Australian dollars, at BBSY Rates, due June 2025, secured by a pledge of project assets and contracts, \$58 million AUD (2019 - \$63 million AUD) ⁽³⁾	Floating ⁽⁴⁾	56	58
ATCO Gas Australia revolving credit facility, payable in Australian dollars, at BBSY rates, due October 2023, \$275 million AUD (2019 - \$275 million AUD) ⁽³⁾	Floating ⁽⁴⁾	268	250
ATCO Gas Australia revolving credit facility, payable in Australian dollars, at BBSY rates, due July 2023, \$405 million AUD (2019 - \$405 million AUD) ⁽³⁾	Floating ⁽⁴⁾	394	369
Electricidad del Golfo credit facility, payable in Mexican pesos, at Mexican Interbank rates, due March 2023, \$570 million MXP (2019 - \$570 million MXP)	Floating ⁽⁴⁾	36	39
ATCO Investments Ltd. mortgage, at BA rates, payable in Canadian dollars, due March 2028	Floating ⁽⁴⁾	93	95
ATCO Ltd. extendible revolving credit facility, at BA rates, due August 2021 ⁽³⁾	Floating	138	138
ATCO Ltd. fixed-to-floating rate subordinated notes, due November 2078	5.50% ⁽⁵⁾	200	200
ATCO Structures & Logistics credit facility, at BA rates, due January 2021 ⁽³⁾	Floating	106	40
ATCO Structures & Logistics credit facility, at BA rates, due September 2023 ⁽³⁾	Floating	20	-
ATCO Sabinco credit facilities, payable in Chilean pesos, 2.86%, due April 2021, \$4 billion CLP (2019 - nil) ⁽⁶⁾	3.221%	7	-
ATCO Sabinco credit facility, payable in Chilean pesos, 2.88%, due February 2021, \$2 billion CLP (2019 - nil) ⁽⁶⁾	3.221%	4	-
Less: deferred financing charges		(49)	(49)
		9,619	9,436
Less: amounts due within one year		(196)	(173)
		9,423	9,263

BBSY - Bank Bill Swap Benchmark Rate

BA - Bankers' Acceptance

- (1) Interest rate is the average effective interest rate weighted by principal amounts outstanding.
- (2) During 2020, the expiry date of the CU Inc. other long-term obligation was extended from June 2021 to June 2022.
- (3) During 2020, the above interest rates had additional margin fees at a weighted average rate of 1.22 per cent (2019 - 0.99 per cent). The margin fees are subject to escalation.
- (4) Floating interest rates have been partially or completely hedged with interest rate swaps (see Note 19).
- (5) The rate of 5.50 per cent is fixed for the period from November 1, 2018 to October 31, 2028. Starting November 1, 2028, on every interest reset date (February 1, May 1, August 1, November 1) of each year until November 1, 2048, the interest rate will be reset to the three month BA plus 2.92 per cent. Starting November 1, 2048, on every interest reset date of each year until November 1, 2078, the interest rate will be reset to BA rate plus 3.67 per cent.
- (6) ATCO Sabinco credit facilities were acquired as part of the increase in ownership interest in ATCO Sabinco S.A. (see Note 26).

DEBENTURE ISSUANCES

On September 28, 2020, CU Inc., a wholly owned subsidiary of Canadian Utilities Limited, issued \$150 million of 2.609 per cent debentures maturing on September 28, 2050. The Company also repaid \$100 million of 11.77 per cent debentures on November 30, 2020.

On September 5, 2019, CU Inc. issued \$580 million of 2.963 per cent debentures maturing on September 7, 2049. CU Inc. also repaid \$180 million of 5.432 per cent debentures on January 23, 2019 and \$300 million of 6.8 per cent debentures on August 13, 2019.

OTHER LONG TERM DEBT ISSUANCES AND REPAYMENTS

ATCO Power Australia re-financing

In the first quarter of 2020, ATCO Power Australia, a subsidiary of Canadian Utilities Limited, refinanced its \$63 million Australian dollars credit facility with a new lender at Bank Bill Swap Benchmark Rate (BBSY) plus margin fee, extending the credit facility's maturity from February 2020 to June 2025. The floating BBSY interest rate is hedged to June 23, 2025 with an interest rate swap agreement which fixes the interest rate at 1.68 per cent.

PLEDGED ASSETS

The ATCO Power Australia credit facility is guaranteed by Canadian Utilities Limited and is secured by a mortgage on certain assets of the Karratha Power Plant and an assignment of certain contracts and agreements. The Karratha Power Plant is accounted for as a finance lease receivable.

The ATCO Investments Limited mortgage is secured by certain of the Company's real estate holdings.

The ATCO Structures & Logistics credit facilities are secured by a general assignment of ATCO Structures & Logistics' present and future property, assets, undertakings and equity interests in certain of its restricted subsidiaries and joint ventures.

At December 31, 2020, the book value of assets pledged to maintain the Company's long-term credit facilities was \$860 million at (2019 - \$709 million).

14. RETIREMENT BENEFITS

The Company maintains registered defined benefit and defined contribution pension plans for most of its employees. It also provides other post-employment benefits (OPEB), principally health, dental and life insurance, for retirees and their dependents. The defined benefit pension plans provide for pensions based on employees' length of service and final average earnings. As of 1997, new employees of Canadian Utilities Limited and its subsidiaries, and, as of 2005, new employees of ATCO Structures & Logistics, automatically participate in the defined contribution pension plans.

The Company also maintains non-registered, non-funded defined benefit pension plans for certain officers and key employees.

The majority of benefit payments are made from trustee-administered funds; however, there are a number of unfunded plans where the Company makes the benefit payments. Plan assets held in trusts are governed by provincial and federal legislation and regulations, as is the relationship between the Company and the trustee. The Pension Committees of the Boards of Directors of Canadian Utilities Limited and ATCO Structures & Logistics are responsible for governance of the funded plans and policy decisions related to benefit design, liability management, and funding and investment, including selection of investment managers and investment options for the plans.

BENEFIT PLAN ASSETS, OBLIGATIONS AND FUNDED STATUS

The changes in Company's pension and OPEB plan assets and obligations are as follows:

	2020		2019	
	Pension Benefit Plans	OPEB Plans	Pension Benefit Plans	OPEB Plans
Market value of plan assets				
Beginning of year	2,903	–	2,667	–
Interest income	87	–	95	–
Employee contributions	1	–	1	–
Employer contributions	13	–	21	–
Benefit payments	(139)	–	(127)	–
Return on plan assets, excluding amounts included in interest income	240	–	246	–
End of year	3,105	–	2,903	–
Accrued benefit obligations				
Beginning of year	3,207	125	2,933	118
Current service cost	16	2	19	2
Interest cost	97	4	108	5
Employee contributions	1	–	1	–
Benefit payments from plan assets	(139)	–	(127)	–
Benefit payments by employer	(7)	(4)	(8)	(5)
Curtailment gain ⁽¹⁾	–	–	(10)	(2)
Actuarial losses	226	12	297	7
Past service cost (credit)	4	–	(6)	–
End of year ⁽²⁾	3,405	139	3,207	125
Funded status				
Net retirement benefit obligations	300	139	304	125

(1) In 2019, as a result of a reduction of plan members due to the sale of the Canadian fossil fuel-based electricity generation business (see Note 23), the Company recorded a curtailment gain of \$12 million. This gain was included in salaries, wages and benefits expense in the consolidated statements of earnings.

(2) The non-registered, non-funded defined benefit pension plans accrued benefit obligations increased to \$180 million at December 31, 2020 due to a decrease in the liability discount rate and experience adjustments (2019 - increased to \$166 million due to a decrease in the liability discount rate and experience adjustments).

BENEFIT PLAN COST

The components of benefit plan cost are as follows:

	2020		2019	
	Pension Benefit Plans	OPEB Plans	Pension Benefit Plans	OPEB Plans
Current service cost	16	2	19	2
Interest cost	97	4	108	5
Interest income	(87)	–	(95)	–
Curtailment gain	–	–	(10)	(2)
Past service cost (credit)	4	–	(6)	–
Defined benefit plans cost	30	6	16	5
Defined contribution plans cost	29	–	29	–
Total cost	59	6	45	5
Less: capitalized	24	3	20	3
Net cost recognized	35	3	25	2

RE-MEASUREMENT OF RETIREMENT BENEFITS

Re-measurements of the pension and OPEB plans are as follows:

	2020		2019	
	Pension Benefit Plans	OPEB Plans	Pension Benefit Plans	OPEB Plans
Gains on plan assets from:				
Return on plan assets, excluding amounts included in net interest expense	240	–	246	–
Losses gains on plan obligations from:				
Changes in financial assumptions	(226)	(12)	(297)	(7)
Gains (losses) recognized in other comprehensive income⁽¹⁾	14	(12)	(51)	(7)

(1) Gains net of income taxes were \$2 million for the year ended December 31, 2020 (2019 - Losses net of income taxes of \$44 million).

PLAN ASSETS

The market values of the Company's defined benefit pension plan assets at December 31 are as follows:

Plan asset mix	2020				2019			
	Quoted	Un-quoted	Total	%	Quoted	Un-quoted	Total	%
Equity securities

(1) The land and building are leased by the Company.

FUNDING

In 2020, an actuarial valuation for funding purposes as of December 31, 2019 was completed for the registered defined benefit pension plans. The estimated contribution for 2021 is \$13 million. The next actuarial valuation for funding purposes must be completed as of December 31, 2022.

WEIGHTED AVERAGE ASSUMPTIONS

The significant assumptions used to determine the benefit plan cost and accrued benefit obligation are as follows:

	2020		2019	
	Pension Benefit Plans	OPEB Plans	Pension Benefit Plans	OPEB Plans
Benefit plan cost				
Discount rate for the year ⁽¹⁾	3.10 %	3.10 %	3.80 %	3.80 %
Average compensation increase for the year	2.50 %	n/a	2.50 %	n/a
Accrued benefit obligations				
Discount rate at December 31	2.58 %	2.58 %	3.10 %	3.10 %
Long-term inflation rate	2.00 %	n/a	2.00 %	n/a
Health care cost trend rate:				
Drug costs ⁽²⁾	n/a	5.11 %	n/a	5.17 %
Other medical costs	n/a	4.00 %	n/a	4.00 %
Dental costs	n/a	4.00 %	n/a	4.00 %

(1) The discount rate assumption for 2019 was 3.80 per cent up to September 30, 2019, at which time there was a plan curtailment due to the sale of the Canadian fossil fuel-based electricity generation portfolio (see Note 23). The discount rate assumption for the period from October 1, 2019 to December 31, 2019, was 3.00 per cent.

(2) The Company uses a graded drug cost trend rate, which assumes 5.11 per cent rate per annum, grading down to 4.00 per cent in and after 2040.

The weighted average duration of the defined benefit obligation is 13.5 years.

RISKS

The Company is exposed to a number of risks related to its defined benefit pension plans and OPEB plans. The most significant risks are described below.

Investment risk

The Company makes investment decisions for its funded plans using an asset-liability matching framework. Within this framework, the Company's objective over time is to increase the proportion of plan assets in fixed income securities with maturities that match the expected benefit payments as they fall due. However, due to the long-term nature of the benefit obligations, the strength of the Company, and the belief that a diversified portfolio offers an appropriate risk-return profile, the Company continues to invest in equity securities, global fixed income and Canadian real estate in addition to Canadian fixed income. The Company has not changed the processes used to manage its risks from previous periods.

Interest rate risk

A decrease in long-term interest rates will increase accrued benefit obligations, which will be partially offset by an increase in the value of the plans' bond holdings. Other things remaining the same, a further decrease in long-term interest rates will cause the funded status to deteriorate, while increases in interest rates will result in gains.

Compensation risk

The present value of the accrued benefit obligations is calculated using the estimated future compensation of plan participants. Should future compensation be higher than estimated, benefit obligations will increase.

Inflation risk

Accrued benefit obligations are linked to inflation, and higher inflation will lead to increased obligations. For the defined benefit pension plans, inflation risk is mitigated because the indexing of benefit payments is capped at an annual increase of 3.0 per cent.

The majority of plan assets are also affected by inflation. As inflation rises, long-term interest rates will likely rise, pushing up bond yields and reducing the value of existing fixed rate bonds. The relationship between equities and inflation is not as clear, but generally speaking, high inflation has a negative impact on equity valuations. Overall, rising inflation will likely reduce a plan surplus or increase a deficit.

Life expectancy

Should pensioners live longer than assumed, benefit obligations and liabilities will be larger than expected.

SENSITIVITIES

The 2020 sensitivities of significant assumptions used in measuring the Company's pension and OPEB plans are as follows:

Assumption	Per cent Change	Accrued Benefit Obligation		Net Benefit Plan Cost	
		Increase in Assumption	Decrease in Assumption	Increase in Assumption	Decrease in Assumption
Discount rate	1 %	(435)	541	6	(9)
Future compensation rate	1 %	10	(8)	1	-
Long-term inflation rate ⁽¹⁾	1 %	459	(378)	10	(7)
Health care cost trend rate	1 %	11	(9)	-	-
Life expectancy	10 %	(88)	101	(1)	2

(1) The long-term inflation rate for pension plans reflects the fact that pension plan benefit payments have historically been indexed annually to increases in the Canadian Consumer Price Index to a maximum increase of 3.0 per cent per annum.

The above sensitivities have been calculated independently of each other. Actual experience may result in changes in a number of assumptions simultaneously.

15. BALANCES FROM CONTRACTS WITH CUSTOMERS

Balances from contracts with customers are comprised of accounts receivable and contract assets and customer contributions.

ACCOUNTS RECEIVABLE AND CONTRACT ASSETS

At December 31, accounts receivable and contract assets are as follows:

	2020	2019
Trade accounts receivable and contract assets	712	711
Other accounts receivable	15	20
	727	731
Contract assets included in other assets	2	-
	729	731

The significant changes in trade accounts receivable and contract assets are as follows:

December 31, 2018	719
Revenue from satisfied performance obligations	4,132
Customer billings and other items not included in revenue	556
Sale of operations (Note 23)	(72)
Payments received	(4,621)
Foreign exchange rate adjustment	(3)
December 31, 2019	711
Revenue from satisfied performance obligations	3,644
Customer billings and other items not included in revenue	411
Acquisition of ATCO Sabinco (Note 26)	16
Credit loss allowance	(2)
Payments received	(4,055)
Foreign exchange rate adjustment and other	(11)
December 31, 2020	714

CUSTOMER CONTRIBUTIONS

Certain additions to property, plant and equipment, mainly in the utilities, are made with the assistance of non-refundable cash contributions from customers. These contributions are made when the estimated revenue is less than the cost of providing service or where the customer needs special equipment. Since these contributions will provide customers with on-going access to the supply of natural gas or electricity, they represent deferred revenues and are recognized in revenues over the life of the related asset.

Changes in customer contributions balance are summarized below.

December 31, 2018	1,798
Receipt of customer contributions	85
Sale of operations (<i>Note 23</i>)	(97)
Amortization	(66)
December 31, 2019	1,720
Receipt of customer contributions	82
Amortization	(56)
Transfers from other liabilities and foreign exchange rate adjustment	10
December 31, 2020	1,756

16. LEASES

THE COMPANY AS LESSEE

Right-of-use assets

The Company's right-of-use assets mainly relate to the lease of land and buildings.

	Land and Buildings
Cost	
January 1, 2019	107
Additions	9
Foreign exchange rate adjustment	(2)
December 31, 2019	114
Additions	15
Disposals	(2)
Foreign exchange rate adjustment	2
December 31, 2020	129
Accumulated depreciation	
January 1, 2019	-
Depreciation	18
December 31, 2019	18
Depreciation	16
Disposals	(2)
December 31, 2020	32
Net book value	
December 31, 2019	96
December 31, 2020	97

Lease liabilities

The Company has recognized lease liabilities in relation to the arrangements to lease land and buildings. The reconciliation of movements in lease liabilities is as follows:

	Note	
January 1, 2019		107
Additions		9
Interest expense	6	3
Lease payments		(19)
Foreign exchange rate adjustment		(1)
December 31, 2019		99
Additions		15
Interest expense	6	3
Lease payments		(18)
Foreign exchange rate adjustment		1
December 31, 2020		100
Less: amounts due within one year		(16)
December 31, 2020		84

The maturity analysis of the undiscounted contractual balances of the lease liabilities is as follows:

In one year or less	18
In more than one year, but not more than five years	62
In more than five years	46
	126

The amounts expensed in the consolidated statements of earnings for the year ended December 31, in relation to short-term leases and low-value leases are as follows:

	2020	2019
Short-term leases	9	8
Low-value leases	6	6
	15	14

During the years ended December 31, 2020 and 2019, less than a million of expenses were incurred in relation to low-value leases, and no expenses were incurred in relation to leases with variable payments.

THE COMPANY AS LESSOR

The Company is party to certain arrangements that convey the right to use electricity generation and non-regulated electricity transmission assets. These arrangements are classified as finance leases, with the Company as the lessor.

As at December 31, 2020 and 2019, the Company's operating leases include rentals of modular structures.

Finance leases

The total net investment in finance leases is shown below. Finance lease income is recognized in revenues.

	2020	2019
Net investment in finance leases		
Finance lease - gross investment	315	331
Unearned finance income	(140)	(152)
	175	179
Current portion	9	9
Non-current portion	166	170
	175	179
Gross receivables from finance leases		
In one year or less	27	26
In more than one year, but not more than five years	109	105
In more than five years	179	200
	315	331
Net investment in finance leases		
In one year or less	9	9
In more than one year, but not more than five years	49	44
In more than five years	117	126
	175	179

During the year ended December 31, 2020, \$1 million of contingent rent was recognized as income from these finance leases (2019 - \$2 million).

Operating leases

The aggregate future minimum lease payments receivable under non-cancellable operating leases are:

	2020	2019
Minimum lease payments receivable		
In one year or less	79	45
In more than one year, but not more than five years	72	26
In more than five years	1	-
	152	71

During the year ended December 31, 2020 and 2019, no contingent rent was recognized as income from these operating leases.

17. CLASS I NON-VOTING AND CLASS II VOTING SHARES

A reconciliation of the number and dollar amount of outstanding Class I and Class II Shares at December 31 is shown below.

AUTHORIZED AND ISSUED

	Class I Non-Voting		Class II Voting		Total	
	Shares	Amount	Shares	Amount	Shares	Amount
Authorized:	300,000,000		50,000,000		350,000,000	
Issued and outstanding:						
December 31, 2018	101,428,881	182	13,231,247	2	114,660,128	184
Purchased and cancelled	(101,350)	-	-	-	(101,350)	-
Stock options exercised	107,950	3	-	-	107,950	3
Converted: Class II to Class I	28,300	-	(28,300)	-	-	-
December 31, 2019	101,463,781	185	13,202,947	2	114,666,728	187
Purchased and cancelled	(150,000)	-	-	-	(150,000)	-
Stock options exercised	27,300	1	-	-	27,300	1
Converted: Class II to Class I	6,818	-	(6,818)	-	-	-
December 31, 2020	101,347,899	186	13,196,129	2	114,544,028	188

Class I and Class II Shares have no par value.

MID-TERM INCENTIVE PLAN

The Company's MTIP trust is considered a special purpose entity which is consolidated in these financial statements. The Class I Shares, while held in trust, are accounted for as a reduction of share capital. The consolidated Class I and Class II Shares outstanding at December 31 is shown below.

	2020		2019	
	Shares	Amount	Shares	Amount
Shares issued and outstanding	114,544,028	188	114,666,728	187
Shares held in trust for the mid-term incentive plan	(244,209)	(10)	(321,948)	(14)
Shares outstanding, net of shares held in trust	114,299,819	178	114,344,780	173

DIVIDENDS

The Company declared and paid cash dividends of \$1.7408 per Class I and Class II Share during 2020 (2019 - \$1.6192). The Company's policy is to pay dividends quarterly on its Class I and Class II Shares. The payment and amount of any quarterly dividend is at the discretion of the Board and depends on the financial condition of the Company and other factors.

On January 14, 2021, the Company declared a first quarter dividend of \$0.4483 per Class I and Class II Share.

SHARE OWNER RIGHTS

Each Class II Share may be converted into one Class I Share at any time at the share owner's option. If an offer to purchase all Class II Shares is made, and such offer is accepted and taken up by the owners of a majority of the Class II Shares, and if, at the same time, an offer is not made to the Class I Share owners on the same terms and conditions, then the Class I Shares will be entitled to the same voting rights as the Class II Shares. The two share classes rank equally in all other respects, except for voting rights.

NORMAL COURSE ISSUER BID

On March 9, 2020, ATCO Ltd. began a normal course issuer bid to purchase up to 1,014,684 outstanding Class I Shares. The bid expires on March 8, 2021. The prior year normal course issuer bid to purchase up to 1,014,294 outstanding Class I Shares began on March 8, 2019 and expired on March 7, 2020.

During the year ended December 31, 2020, 150,000 shares were purchased for \$6 million, resulting in no impact to share capital and a decrease to retained earnings of \$6 million (2019 - 101,350 shares were purchased for \$5 million, resulting in no impact to share capital and a decrease to retained earnings of \$5 million).

18. CASH FLOW INFORMATION

ADJUSTMENTS TO RECONCILE EARNINGS TO CASH FLOWS FROM OPERATING ACTIVITIES

Adjustments to reconcile earnings to cash flows from operating activities for the year ended December 31 are summarized below.

	2020	2019
Depreciation, amortization and impairment	669	637
Gain on sale of operations (Note 23)	-	(174)
Earnings from investment in associate company	(15)	(15)
Dividends received from associate company	17	12
Earnings from investment in joint ventures, net of dividends and distributions received	(14)	-
Dividends and distributions received from investment in joint ventures, net of earnings	-	1
Income tax expense	166	66
Unearned availability incentives	-	7
Unrealized losses (gains) on derivative financial instruments	10	(7)
Contributions by customers for extensions to plant	82	85
Amortization of customer contributions	(56)	(66)
Net finance costs	407	484
Income taxes paid	(31)	(94)
Provision on early termination of the master service agreement for managed IT services (Note 3)	75	-
Other	(3)	(16)
	1,307	920

CHANGES IN NON-CASH WORKING CAPITAL

The changes in non-cash working capital for the year ended December 31 are summarized below.

	2020	2019
Operating activities		
Accounts receivable and contract assets	28	64
Inventories	(2)	(5)
Prepaid expenses and other current assets	(4)	(37)
Accounts payable and accrued liabilities	12	(202)
Provisions and other current liabilities	5	(25)
	39	(205)
Investing activities		
Accounts receivable and contract assets	(4)	7
Inventories	-	4
Prepaid expenses and other current assets	-	2
Accounts payable and accrued liabilities	-	(6)
	(4)	7

DEBT RECONCILIATION

The reconciliation of the changes in debt for the year ended December 31 is shown below.

	Short-term debt	Long-term debt	Non-recourse debt	Total
Liabilities from financing activities				
December 31, 2018	175	9,397	1,401	10,973
Net (repayment) issue of debt	(175)	78	(32)	(129)
Foreign currency translation	-	(38)	-	(38)
Sale of operations (Note 23)	-	-	(1,371)	(1,371)
Debt issue costs	-	(4)	-	(4)
Amortization of deferred financing charges	-	3	2	5
December 31, 2019	-	9,436	-	9,436
Net issue of debt	-	129	-	129
Acquisition of ATCO Sabinco (Note 26)	-	11	-	11
Foreign currency translation	-	43	-	43
Debt issue costs	-	(3)	-	(3)
Amortization of deferred financing charges	-	3	-	3
December 31, 2020	-	9,619	-	9,619

See Note 16 for the reconciliation of the changes in lease liability for the years ended December 31, 2020 and 2019.

CASH POSITION

Cash position in the consolidated statements of cash flows at December 31 is comprised of:

	2020	2019
Cash	1,059	1,061
Short-term investments	5	-
Restricted cash ⁽¹⁾	39	79
Cash and cash equivalents	1,103	1,140
Bank indebtedness	(3)	-
	1,100	1,140

(1) Cash balances which are restricted under the terms of joint arrangement agreements are considered not available for general use by the Company.

19. FINANCIAL INSTRUMENTS

FAIR VALUE MEASUREMENT

Financial instruments are measured at amortized cost or fair value. Fair value represents the estimated amounts at which financial instruments could be exchanged between knowledgeable and willing parties in an arm's length transaction. Determining fair value requires management judgment. The valuation methods used to determine the fair value of each financial instrument and its associated level in the fair value hierarchy is described below.

Financial Instruments	Fair Value Method
Measured at Amortized Cost	
Cash and cash equivalents, accounts receivable and contract assets, bank indebtedness, and accounts payable and accrued liabilities	Assumed to approximate carrying value due to their short-term nature.
Finance lease receivables	Determined using a risk-adjusted interest rate to discount future cash receipts (Level 2).
Long-term debt	Determined using quoted market prices for the same or similar issues. Where the market prices are not available, fair values are estimated using discounted cash flow analysis based on the Company's current borrowing rate for similar borrowing arrangements (Level 2).
Measured at Fair Value	
Interest rate swaps	Determined using interest rate yield curves at period-end (Level 2).
Foreign currency contracts	Determined using quoted forward exchange rates at period-end (Level 2).
Commodity contracts	Determined using observable period-end forward curves and quoted spot market prices with inputs validated by publicly available market providers (Level 2). Determined using statistical techniques to derive period-end forward curves using unobservable inputs or extrapolation from spot prices in certain commodity contracts (Level 3).

FINANCIAL INSTRUMENTS MEASURED AT AMORTIZED COST

At December 31, the fair values of the Company's financial instruments measured at amortized cost are as follows:

Recurring Measurements	Carrying Value	2020		2019	
		Fair Value	Carrying Value	Fair Value	Carrying Value
Financial Assets					
Finance lease receivables	175	254	179	227	
Financial Liabilities					
Long-term debt	9,619	11,987	9,436	11,098	

FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE

The Company's derivative instruments are measured at fair value. At December 31, 2020 and 2019, the following derivative instruments were outstanding:

- interest rate swaps for the purpose of limiting interest rate risk on the variable future cash flows of long-term debt;
- foreign currency forward contracts for the purpose of limiting exposure to exchange rate fluctuations relating to expenditures denominated in Mexican pesos and U.S. dollars; and
- natural gas and forward power sale and purchase contracts for the purpose of limiting exposure to electricity and natural gas market price movements.

The balance sheet classification and fair values of the Company's derivative financial instruments are as follows:

Recurring Measurements	Subject to Hedge Accounting		Not Subject to Hedge Accounting		Total Fair Value of Derivatives
	Interest Rate Swaps	Commodities	Commodities	Foreign Currency Forward Contracts	
December 31, 2020					
Financial Assets					
Prepaid expenses and other current assets	-	25	5	-	30
Other assets	-	12	4	-	16
Financial Liabilities					
Provisions and other current liabilities	3	6	8	-	17
Other liabilities ⁽¹⁾	27	4	3	-	34
December 31, 2019					
Financial Assets					
Prepaid expenses and other current assets	-	20	-	-	20
Other assets	5	21	-	-	26
Financial Liabilities					
Provisions and other current liabilities ⁽¹⁾	1	11	-	2	14
Other liabilities ⁽¹⁾	5	10	-	-	15

(1) At December 31, 2020, financial liabilities include \$1 million of Level 3 derivative financial instruments (December 31, 2019 - \$7 million).

During the year ended December 31, 2020, losses before income taxes of \$19 million were recognized in other comprehensive income (OCI) (2019 - losses of \$3 million), none of which were reclassified to the statement of earnings (2019 - losses of \$22 million were reclassified to the statement of earnings, of which \$11 million were reclassified on sale of the Canadian fossil fuel-based electricity generation business (see Note 23)).

Hedge ineffectiveness of \$3 million was recognized in the statement of earnings during 2020 (2019 - \$19 million). Over the next 12 months, the Company estimates that gains before income taxes of \$6 million will be reclassified from accumulated other comprehensive income (AOCI) to earnings.

Notional and maturity summary

The notional value and maturity dates of the Company's derivative instruments outstanding are as follows:

Notional value and maturity	Subject to Hedge Accounting			Not Subject to Hedge Accounting		
	Interest Rate Swaps	Natural Gas ⁽¹⁾	Power ⁽²⁾	Natural Gas ⁽¹⁾	Power ⁽²⁾	Foreign Currency Forward Contracts
December 31, 2020						
Purchases ⁽³⁾	–	10,593,800	2,203,836	–	–	–
Sales ⁽³⁾	–	3,238,242	759,246	7,867,560	1,089,495	–
Currency						
Canadian dollars	93	–	–	–	–	–
Australian dollars	738	–	–	–	–	–
Mexican pesos	570	–	–	–	–	100
Maturity	2023-2028	2021-2025	2021-2025	2021-2024	2021-2024	2021
December 31, 2019						
Purchases ⁽³⁾	–	19,680,771	2,627,765	–	–	–
Sales ⁽³⁾	–	20,456,673	2,215,145	7,000,000	–	–
Currency						
Canadian dollars	96	–	–	–	–	–
Australian dollars	743	–	–	–	–	–
Mexican pesos	570	–	–	–	–	100
U.S. dollars	–	–	–	–	–	46
Maturity	2020-2028	2020-2024	2020-2024	2020-2021	–	2020

(1) Notional amounts for the natural gas purchase contracts are the maximum volumes that can be purchased over the terms of the contracts.

(2) Notional amounts for the forward power sale and purchase contracts are the commodity volumes committed in the contracts.

(3) Volumes for natural gas and power derivatives are in GJ and MWh, respectively.

OFFSETTING FINANCIAL ASSETS AND LIABILITIES

Netting arrangements and similar agreements provide counterparties the legal right to set-off liabilities against assets received. The following financial assets and financial liabilities are subject to offsetting at December 31:

	Effects of Offsetting on the Balance Sheet		
	Gross Amount	Gross Amount Offset	Net Amount Recognized
2020			
Financial Assets			
Derivative assets ⁽¹⁾	45	–	45
Accounts receivable and contract assets	61	(39)	22
Financial Liabilities			
Derivative liabilities ⁽¹⁾	20	–	20
2019			
Financial Assets			
Accounts receivable and contract assets	59	(37)	22

(1) The Company enters into derivative transactions based on master agreements in which there is a set-off provision under certain circumstances, such as default. The agreements do not meet the criteria for offsetting in the consolidated balance sheet since the Company does not presently have a legally enforceable right to set-off. This right is enforceable only if certain credit events occur in the future.

20. RISK MANAGEMENT

FINANCIAL RISKS

The Company is exposed to a variety of risks associated with the use of financial instruments: market risk, credit risk and liquidity risk. The Company may use various derivative financial instruments to manage its exposure in these areas. All such instruments are used to manage risk and are not for trading purposes.

The Company's Board is responsible for understanding the principal risks of the Company's business, achieving a proper balance between risks incurred and the potential return to share owners, and confirming there are controls in place to effectively monitor and manage those risks with a view to the long-term viability of the Company. The Board established the Audit & Risk Committee to review significant risks associated with future performance, growth and lost opportunities identified by management that could materially affect the Company's ability to achieve its strategic or operational targets. This committee is responsible for confirming that management has procedures in place to mitigate identified risks.

The source of risk exposure and how each is managed is outlined below.

MARKET RISK

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in interest rates. The Company's interest-bearing assets and liabilities include cash and cash equivalents, bank indebtedness and long-term debt. The interest rate risk faced by the Company is primarily due to its cash and cash equivalents and floating rate long-term debt.

Cash and cash equivalents include fixed rate instruments with maturities of generally 90 days or less that are reinvested as they mature. The Company is exposed to interest rate movements after these investments mature.

The Company's risk management policy is to hedge all material interest rate risk exposures related to long-term financings when the risk is incurred, unless commercial arrangements or mechanisms are in place to offset such interest rate risk. The Company has fixed interest rates, either directly or through interest rate swap agreements, on 97 per cent (2019 - 98 per cent) of total long-term debt. Consequently, the exposure to fluctuations in market interest rates is limited.

A 25 basis point increase or decrease in interest rates would increase or decrease earnings by less than \$1 million. This analysis has been determined based on the exposure to interest rates for financial instruments outstanding at December 31, 2020.

Foreign exchange risk

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company operates internationally and is exposed to foreign exchange risk from financial instruments denominated in currencies other than the functional currency of an operation and on its net investments in foreign subsidiaries. The majority of this currency risk arises from exposure to the U.S. dollar and Australian dollar. The Company offsets foreign exchange volatility in part by entering into foreign currency derivative contracts and by financing with foreign-denominated debt. The Company's risk management policy is to hedge all material transactions with foreign exchange risks arising from the sale or purchase of goods and services where revenue or the costs to be incurred are denominated in a currency other than the functional currency of the transacting company.

A 10 per cent increase or decrease in foreign exchange rates would each increase or decrease OCI by the following:

	OCI
U.S. dollar	5
Australian dollar	58

The sensitivity analysis is based on management's assessment that an average 10 per cent increase or decrease in these currencies relative to the Canadian dollar is a reasonable potential change over the next year. This analysis has been determined based on the exposure to foreign exchange for financial instruments outstanding at December 31, 2020.

The sensitivity analysis excludes translation risk associated with the translation of subsidiaries that have a different functional currency than the functional currency of the Company.

Energy commodity price risk

Energy commodity price risk is the risk that the fair value or future cash flows of natural gas and electricity sales and purchases will fluctuate due to changes in market prices. Fluctuations in market prices result from changes in supply and customer demand, fuel costs, market conditions, weather, regulatory policies, and other factors. The Company's retail energy and natural gas storage businesses are exposed to commodity price movements, particularly to the market price of natural gas and electricity.

Anticipated price risks are calculated based on the Company's customer demand requirements and supply requirements to natural gas and electricity. These are consistently observed and analyzed to ensure that operational and commercial strategic policies to mitigate pricing risk are met.

The Company manages its price risk as part of its strategy by entering into hedging contracts, including short-term and long-term fixed price sale and purchase contracts. Management actively monitors its derivative transactions in accordance with its risk management policy. This policy sets out pre-defined risks and financial parameters so that price fluctuations do not materially affect the margins the Company ultimately receives.

The Company is also exposed to seasonal natural gas price spreads in its natural gas storage operations. Management mitigates this risk by entering into short-term and long-term firm capacity arrangements, where appropriate.

The Company's natural gas and electricity contracts associated with financial derivatives are significantly influenced by the variability of forward spot prices.

A 10 per cent increase or decrease in the forward price of natural gas or electricity would increase or decrease earnings by \$6 million, and would increase or decrease OCI by \$8 million. This analysis assumes that changes in the forward price of natural gas and electricity affects the mark-to-market adjustment of the purchase and sale contracts.

CREDIT RISK

Credit risk is the risk of financial loss due to a counterparty's inability to discharge their contractual obligations to the Company. The Company is exposed to credit risk on its cash and cash equivalents, accounts receivable and contract assets, finance lease receivable and derivative instrument assets. The exposure to credit risk represents the total carrying amount of these financial instruments in the consolidated balance sheet.

The Company manages its credit risk on cash and cash equivalents by investing in instruments issued by credit-worthy financial institutions and in short-term instruments issued by the federal government.

Accounts receivable and contract assets and finance lease receivable credit risk is reduced by transacting with credit-worthy customers in accordance with the established credit approval policies, diversified customer base and through collateral arrangements such as letters of credit, corporate guarantees and cash deposits. The utilities are also able to recover an estimate for their credit loss allowances through approved customer rates and to request recovery through customer rates for any losses from retailers beyond the retailer security mandated by provincial regulations.

Derivative credit risk arises from the possibility that a counterparty to a contract fails to perform according to its terms and conditions. This risk is mitigated by dealing with large, credit-worthy counterparties and continuous monitoring of the counterparty risk exposure. The Company has in certain instances entered into master netting agreements with its derivative counterparties, which provides a right to offset for certain exposures between the parties.

The Company does not have a concentration of credit risk with any counterparty, except for finance lease receivables, which by its nature is with a single counterparty.

Depending on the nature of accounts receivable and contract assets, the Company estimates credit losses based on the expected credit loss rates for respective credit ratings. At December 31, the summary of the expected credit loss rates for respective credit ratings is as follows:

	High (AA to AAA)	Medium (BBB to A)	(BB and below)
December 31, 2020	0%-0.02%	0.05%-0.16%	0.51%-3.20%
December 31, 2019	0%-0.02%	0.06%-0.16%	0.53%-3.41%

At December 31, 2020, the Company had approximately \$90 million of accounts receivable and contract assets classified as Low (BB and below) (2019 - approximately \$150 million).

Where the Company believes there is a high probability of a customer default, additional credit allowances are recorded.

The reconciliation of changes in the Company's credit loss allowance is as follows:

	2020	2019
Beginning of year	6	6
Credit loss allowance	12	4
Utilization of credit loss allowance	(10)	(4)
End of year	8	6

The aging analysis of the trade receivables that are past due but not impaired at December 31 is as follows:

	2020	2019
Up to 30 days	652	640
31 to 60 days	18	25
61 to 90 days	6	10
Over 90 days	16	25
	692	700

At December 31, 2020, the Company held \$237 million in letters of credit for certain counterparty receivables (2019 - \$246 million). The Company did not take possession of any collateral it holds as security in 2020 or 2019. The Company has also entered into guarantee arrangements with the parent company of Direct Energy Partnership (Direct Energy) relating to the retail energy supply functions performed by Direct Energy (see Note 29).

LIQUIDITY RISK

Liquidity risk is the risk that the Company will not be able to meet its financial obligations associated with its financial liabilities that are settled in cash or another financial asset. Liquidity risk arises from the Company's general funding needs and in the management of its assets, liabilities and capital structure. The Company considers it prudent to maintain sufficient liquidity to fund approximately one full year of cash requirements to preserve strong financial flexibility. Cash flow from operations provides a substantial portion of the Company's cash requirements. Additional cash requirements are met with the use of existing cash balances, bank borrowings and issuance of long-term debt and preferred shares. Commercial paper borrowings and short-term bank loans are also used under available credit lines to provide flexibility in the timing and amounts of long-term financing.

Lines of credit

At December 31, the Company has the following lines of credit that enable it to obtain financing for general business purposes:

	2020			2019		
	Total	Used	Available	Total	Used	Available
Long-term committed	2,914	814	2,100	2,985	839	2,146
Short-term committed	150	138	12	18	13	5
Uncommitted	571	154	417	571	174	397
	3,635	1,106	2,529	3,574	1,026	2,548

Long-term committed credit facilities have maturities greater than one year. Uncommitted credit facilities have no set maturity and the lender can demand repayment at any time.

Lines of credit utilized at December 31 are comprised of:

	2020	2019
Long-term debt	906	797
Letters of credit	200	229
	1,106	1,026

Commercial paper

The Company is authorized to issue \$1.2 billion of commercial paper against its long-term committed credit facilities.

Maturity analysis of financial obligations

The table below analyzes the remaining contractual maturities at December 31, 2020 of the Company's financial liabilities based on the contractual undiscounted cash flows.

	2021	2022	2023	2024	2025	2026 and thereafter
Accounts payable and accrued liabilities	695	-	-	-	-	-
Long-term debt:						
Principal	329	379	817	129	35	7,979
Interest expense ⁽¹⁾	398	384	364	343	342	6,986
Derivatives ⁽²⁾	13	5	2	-	-	-
	1,435	768	1,183	472	377	14,965

(1) Interest payments on floating rate debt have been estimated using rates in effect at December 31, 2020. Interest payments on debt that has been hedged have been estimated using hedged rates.

(2) Payments on outstanding derivatives have been estimated using exchange rates and commodity prices in effect at December 31, 2020.

The table below analyzes the remaining contractual maturities at December 31, 2019 of the Company's financial liabilities based on the contractual undiscounted cash flows, as reported in the consolidated financial statements for the year ended December 31, 2019.

	2020	2021	2022	2023	2024	2025 and thereafter
Accounts payable and accrued liabilities	675	-	-	-	-	-
Long-term debt:						
Principal	200	557	327	511	123	7,767
Interest expense ⁽¹⁾	412	394	370	352	337	6,687
Derivatives ⁽²⁾	11	8	1	1	-	-
	1,298	959	698	864	460	14,454

(1) Interest payments on floating rate debt have been estimated using rates in effect at December 31, 2019. Interest payments on debt that has been hedged have been estimated using hedged rates.

(2) Payments on outstanding derivatives have been estimated using exchange rates and commodity prices in effect at December 31, 2019.

PANDEMIC RISK

An outbreak of infectious disease, a pandemic or a similar public health threat, such as the COVID-19 pandemic, could adversely impact the Company by causing operating, supply chain and project development delays and disruptions, labor shortages and shutdowns as a result of government regulation and prevention measures, increased strain on employees and compromised levels of customer service, any of which could have a negative impact on the Company's operations.

Any deterioration in general economic and market conditions resulting from a public health threat could negatively affect demand for electricity and natural gas, revenue, operating costs, timing and extent of capital expenditures, results of financing efforts, or credit risk and counterparty risk; any of which could have a negative impact on the Company's business.

While the Company's investments are largely focused on regulated utilities and long-term contracted businesses with strong counterparties creating a resilient investment portfolio, the extent of the COVID-19 pandemic and its future impact on the Company remains uncertain. In response to the evolving situation, the Company's Pandemic Plan was activated in February 2020. The plan included travel restrictions, limited access to facilities, a direction to work from home whenever possible, physical distancing measures and other protocols (including the use of personal protective equipment while at a work premise). Since then, the Company has been following recommendations by local and national public health authorities across the globe to adjust operational requirements as needed to ensure a coordinated approach across the Company. As a result of these efforts and the Company's experience in crisis response, the Company's operations, financial position and performance have not been significantly impacted for the year ended December 31, 2020.

21. CAPITAL DISCLOSURES

The Company's objectives when managing capital are to:

1. Safeguard the Company's ability to continue as a going concern so it can continue to provide returns to share owners and benefits for other stakeholders.
2. Maintain strong investment-grade credit ratings in order to provide efficient and cost-effective access to funds required for operations and growth.

The Company considers both its regulated and non-regulated operations, as well as changes in economic conditions and risks impacting its operations, in managing its capital structure. The Company may adjust the dividends paid to share owners, issue or purchase Class I and Class II Shares, issue or redeem preferred shares, and issue or repay short-term debt, long-term debt and non-recourse long-term debt. Financing decisions are based on assessments by management in line with the Company's objectives, with a goal of managing the financial risk to the Company as a whole.

While the Alberta based Utilities have as their objective to be capitalized according to the AUC-approved capital structure, the Company as a whole is not restricted in the same manner. The Company sets its capital structure relative to risk and to meet financial and operational objectives, while factoring in the decisions of the regulator.

The Company also manages capital to comply with the customary covenants on its debt. A common financial covenant for the Company's debentures and credit facilities is that total debt divided by total capitalization must be less than 75 per cent. The Company defines total debt as the sum of bank indebtedness, short-term debt, long-term debt and non-recourse long-term debt (including their respective current portions). It defines total capitalization as the sum of Class I and Class II Shares, contributed surplus, retained earnings, AOCI, NCI and total debt. Management maintains the debt capitalization ratio well below 75 per cent to sustain access to cost-effective financing.

Debt capitalization does not have standardized meaning under IFRS and might not be comparable to similar measures presented by other companies. Also, the definitions of total debt and total capitalization vary slightly in the Company's debt-related agreements.

The Company's capitalization at December 31 is as follows:

	2020	2019
Bank indebtedness	3	–
Long-term debt	9,619	9,436
Total debt	9,622	9,436
Class I and Class II Shares	178	173
Contributed surplus	6	12
Retained earnings	3,880	3,832
Accumulated other comprehensive loss	(12)	(17)
Non-controlling interests	3,797	3,858
Total equity	7,849	7,858
Total capitalization	17,471	17,294
Debt capitalization	55 %	55 %

For the year ended December 31, 2020, the Company complied with externally imposed requirements on its capital, including covenants related to debentures and credit facilities.

22. SIGNIFICANT JUDGMENTS, ESTIMATES AND ASSUMPTIONS

Significant judgments, estimates and assumptions made by the Company are outlined below.

SIGNIFICANT ACCOUNTING JUDGMENTS

Revenue related items

The Company makes judgments with respect to: determining whether the promised goods and services are considered distinct performance obligations by considering the relationship of such promised goods and services; allocating the transaction price for each distinct performance obligation identified through stand-alone selling price; evaluating when a customer obtains control of the goods or services promised; and evaluating whether the Company acts as principal or agent on certain flow-through charges to customers.

Impairment of financial assets

The impairment loss allowance for financial assets is based on assumptions about risk of default and expected loss rates. The Company makes judgments in making these assumptions and selecting the inputs to the impairment calculation, based on the Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

Associates

Judgment is required when assessing the classification of an investment as an associate. When making this assessment, the Company considers the structure of the investment, the legal form of any separate vehicles, the contractual terms of the investment, and other facts and circumstances.

Joint arrangements

Judgment is required when assessing the classification of a joint arrangement as a joint operation or a joint venture. When making this assessment, the Company considers the structure of the arrangements, the legal form of any separate vehicles, the contractual terms of the arrangements, and other facts and circumstances.

Service concession arrangements

Judgment is required when assessing whether contracts with government entities fall within the scope of IFRIC 12 *Service Concession Arrangements*. Judgment also needs to be exercised when determining the classification to be applied to the service concession asset, allocation of consideration between revenue generating activities, classification of costs incurred and the effective interest rate to be applied to the service concession asset.

Impairment of long-lived assets

Indicators of impairment are considered when evaluating whether or not an asset is impaired. Factors which could indicate an impairment exists include: significant underperformance relative to historical or projected operating results, significant changes in the way in which an asset is used or in the Company's overall business strategy, significant negative industry or economic trends, or adverse decisions by regulators. Events indicating an impairment may be clearly identifiable or based on an accumulation of individually insignificant events over a period of time. Measurement uncertainty is increased where the Company is not the operator of a facility. The Company continually monitors its operating facilities and the markets and business environment in which it operates. Judgments and assessments about conditions and events are made order to conclude whether a possible impairment exists.

Property, plant and equipment and intangibles

The Company makes judgments to: assess the nature of the costs to be capitalized and the time period over which they are capitalized in the purchase or construction of an asset; evaluate the appropriate level of componentization where an asset is made up of individual components for which different depreciation and amortization methods and useful lives are appropriate; distinguish major overhauls to be capitalized from repair and maintenance activities to be expensed; and determine the useful lives over which assets are depreciated and amortized.

Leases

The Company evaluates contract terms and conditions to determine whether they contain or are leases. Where a lease exists, the Company determines whether substantially all of the significant risks and rewards of ownership are

transferred to the customer, in which case it is accounted for as a finance lease, or remain with the Company, in which case it is accounted for as an operating lease.

In the situation where the implicit interest rate in the lease is not readily determined, the Company uses judgment to estimate the incremental borrowing rate for discounting the lease payments. The Company's incremental borrowing rate generally reflects the interest rate that the Company would have to pay to borrow a similar amount at a similar term and with a similar security. The Company estimates the lease term by considering the facts and circumstances that create an economic incentive to exercise an extension or termination option. Certain qualitative and quantitative assumptions are used when evaluating these incentives.

Income taxes

The Company makes judgments with respect to changes in tax legislation, regulations and interpretations thereof. Judgment is also applied to estimating probable outcomes, when temporary differences will reverse, and whether tax assets are realizable.

When tax legislation is subject to interpretation, management periodically evaluates positions taken in tax filings and records provisions where appropriate. The provisions are management's best estimates of the expenditures required to settle the present obligations at the balance sheet date, using a probability weighting of possible outcomes.

SIGNIFICANT ACCOUNTING ESTIMATES AND ASSUMPTIONS

Revenue recognition

An estimate of usage not yet billed is included in revenues from the regulated distribution of natural gas and electricity. The estimate is derived from unbilled gas and electricity distribution services supplied to customers and is based on historical consumption patterns. Management applies judgment to the measure and value of the estimated consumption.

Impairment of financial assets

The impairment loss allowance for financial assets are based on assumptions about risk of default and expected loss rates. For details regarding significant assumptions and key inputs used to calculate impairment loss allowance, see Note 20.

Service concession arrangements

Contracts falling under IFRIC 12 *Service Concession Arrangements* require the use of estimates over the term of the arrangement, including estimates of the services performed to date as a proportion of the total services to be performed. Any change in the long-term estimates could result in significant variation in the amounts recognized under service concession arrangements.

Useful lives of property, plant and equipment and intangibles

Useful lives are estimated based on current facts and past experience taking into account the anticipated physical life of the asset, existing long-term sales agreements and contracts, current and forecast demand, and the potential for technological obsolescence.

Impairment of long-lived assets

The Company continually monitors its long-lived assets and the markets and business environment in which it operates for indications of asset impairment. Where necessary, the Company estimates the recoverable amount for the cash generating unit (CGU) to determine if an impairment loss is to be recognized. These estimates are based on assumptions, such as the price for which the assets in the CGU could be obtained or future cash flows that will be produced by the CGU, discounted at an appropriate rate. Subsequent changes to these estimates or assumptions could significantly impact the carrying value of the assets in the CGU.

Leases

Useful lives of right-of-use assets are based on current facts and past experience taking into account the anticipated physical life of the asset, existing long-term sales agreements and contracts, current and forecast demand, and the potential for technological obsolescence.

Onerous contracts

In assessing the unavoidable costs of meeting obligations under an onerous contract at the reporting date, the Company identifies and quantifies any compensation or penalties, other costs arising from the need to terminate a contract or inability to fulfil it. This process involves judgment about the future events, interpretation of legal terms of a contract, as well as estimates on the timing and amount of future cash flows. The change in used estimates and underlying assumptions can significantly impact the amount of recognized provision in relation to onerous contracts.

Retirement benefits

The Company consults with qualified actuaries when setting the assumptions used to estimate retirement benefit obligations and the cost of providing retirement benefits during the period. These assumptions reflect management's best estimates of the long-term inflation rate, projected salary increases, retirement age, discount rate, health care costs trend rates, life expectancy and termination rates. The discount rate is determined by reference to market yields on high quality corporate bonds. Since the discount rate is based on current yields, it is only a proxy for future yields. Significant assumptions used to determine the retirement benefit cost and obligation are shown in Note 14.

Asset retirement obligations

The Company's estimates regarding asset retirement costs and related obligations change as a result of changes in cost estimates, legal and constructive requirements, market rates and technological advancement. The significant assumptions used to record asset retirement obligations include, but are not limited to, expected timing of retirement of an asset, scope and costs of retirement and reclamation activities, rates of inflation and a pre-tax risk-free discount rate. The estimates and assumptions for asset retirement obligations are reviewed at each reporting period. Changes to the estimates or assumptions could significantly impact the carrying values of the asset retirement obligations.

Income taxes

Management periodically evaluates positions taken in tax filings where tax legislation is subject to interpretation, and records provisions where appropriate. The provisions are management's best estimates of the expenditures required to settle the present obligations at the balance sheet date measured using a probability weighting of possible outcomes.

23. BUSINESS COMBINATIONS

SALE OF OPERATIONS IN 2019

In 2019, proceeds on sale of operations, net of cash disposed, and gain on sale of operations are summarized as follows:

<i>(millions of Canadian Dollars)</i>	Sale of the Canadian fossil fuel-based electricity generation business	Sale of Alberta PowerLine operations	Total
Proceeds on sale of operations:			
Cash consideration received in 2019	770	222	992
Cash and cash equivalents disposed	(89)	-	(89)
Proceeds on sale of operations received in 2019, net of cash and cash equivalents disposed	681	222	903
Cash consideration received in 2020 on final closing adjustments	13	-	13
Total proceeds on sale of operations, received and receivable, net of cash and cash equivalents disposed	694	222	916
Gain (loss) on sale of operations before income taxes	175	(1)	174
Gain (loss) on sale of operations after income taxes and NCI	78	(13)	65

Sale of the Canadian fossil fuel-based electricity generation business

In 2019, the Company closed a series of transactions related to the sale of its Canadian fossil fuel-based electricity generation business. A transaction with Heartland Generation Ltd., an affiliate of Energy Capital Partners included the sale of 10 partly or fully owned natural gas-fired and coal-fired electricity generation assets located in Alberta and British Columbia. In two other separate transactions, the Company sold its 50 per cent ownership interest in the Cory Cogeneration Station to SaskPower International and its 50 per cent ownership interest in Brighton Beach Power to Ontario Power Generation.

The sale resulted in gross proceeds of \$821 million. An additional \$13 million was received in January 2020 for settlement of customary post-closing purchase price adjustments.

Prior to the sale, the assets and liabilities of the Canadian fossil fuel-based electricity generation business were reported in the Energy Infrastructure operating segment.

The below summary illustrates major classes of assets and liabilities included in the sale of the Canadian fossil fuel-based electricity generation business.

<i>(millions of Canadian Dollars)</i>	Assets and liabilities sold
ASSETS	
Current assets	
Cash and cash equivalents	89
Accounts receivable and contract assets	77
Finance lease receivables	12
Prepaid expenses and other current assets	18
	196
Non-current assets	
Property, plant and equipment	535
Intangibles	17
Investment in joint ventures	35
Finance lease receivables	202
Deferred income tax assets	32
Other assets	49
Total assets	1,066
LIABILITIES	
Current liabilities	
Accounts payable, accrued liabilities and other current liabilities	159
Non-recourse long-term debt	10
	169
Non-current liabilities	
Deferred income tax liabilities	33
Customer contributions	96
Other liabilities	187
Non-recourse long-term debt	32
Total liabilities	517
Carrying value of net assets sold	549

The gain on sale of the Canadian fossil fuel-based electricity generation portfolio is shown below.

(millions of Canadian Dollars)

Aggregate consideration as per share purchase agreement	821
Debt adjustments ⁽¹⁾	(109)
Working capital and other purchase price adjustments made in 2019	58
Cash consideration received in 2019	770
Cash consideration received in 2020 on final closing adjustments	13
Cash consideration received and receivable	783
Carrying value of net assets sold and other items	
Carrying value of net assets sold	(549)
Transaction costs ⁽²⁾	(29)
Write-down of natural gas inventory	(19)
Other directly attributable costs	(11)
	(608)
Gain on sale before income taxes	175
Income tax expense	(25)
Gain on sale after income taxes	150
Non-controlling interests	(72)
Gain on sale after income taxes and non-controlling interests	78

(1) Debt adjustments include \$37 million of non-recourse long-term debt of Cory Cogeneration Station assumed by SaskPower International, \$67 million of non-recourse long-term debt of Brighton Beach Power assumed by Ontario Power Generation and \$5 million of non-recourse debt assumed by Heartland Generation Ltd.

(2) Transaction costs relate to success fees, legal costs and other advisory costs directly attributable to the sale of operations.

Sale of Alberta PowerLine operations

In 2019, the Company sold its entire 80 per cent ownership interest in Alberta PowerLine, a partnership between the Company and Quanta Services Inc. The sale resulted in gross proceeds of \$222 million and the assumption of \$1.4 billion of debt, excluding deferred financing charges.

Prior to the sale, the assets and liabilities of Alberta PowerLine were reported in the Energy Infrastructure operating segment.

The below summary illustrates major classes of assets and liabilities included in the sale of Alberta PowerLine.

<i>(millions of Canadian Dollars)</i>	Assets and liabilities sold
ASSETS	
Current assets	
Accounts receivable and contract assets	7
Restricted project funds	83
Receivable under service concession arrangement	106
	196
Non-current assets	
Receivable under service concession arrangement	1,470
Other assets	18
Total assets	1,684
LIABILITIES	
Current liabilities	
Accounts payable, accrued liabilities and other current liabilities	25
Non-recourse long-term debt	20
	45
Non-current liabilities	
Deferred income tax liabilities	56
Other liabilities ⁽¹⁾	62
Non-recourse long-term debt	1,309
Total liabilities	1,472
Carrying value of net assets sold	212

(1) Represents the Canadian Utilities Limited 20 per cent non-controlling ownership interest classified as other liabilities.

The loss on sale of Alberta PowerLine is shown below.

<i>(millions of Canadian Dollars)</i>	
Aggregate consideration as per share purchase agreement	222
Carrying value of net assets sold and other items	
Carrying value of net assets sold	(212)
Transaction costs ⁽¹⁾	(11)
	(223)
Loss on sale before income taxes	(1)
Income tax expense	(24)
Loss on sale after income taxes	(25)
Non-controlling interests	12
Loss on sale after income taxes and non-controlling interests	(13)

(1) Transaction costs relate to success fees, legal costs and other advisory costs directly attributable to the sale of operations.

24. INVESTMENT IN EQUITY INTEREST IN ASSOCIATE COMPANY

In 2018, the Company invested in a 40 per cent interest in Neltume Ports S.A. (Neltume Ports), a leading port operator and developer in South America, for aggregate consideration of \$471 million (equivalent of \$357 million U.S. dollars). Neltume Ports, a subsidiary of Ultramar, operates sixteen port facilities and three port operation services businesses located in Chile, Uruguay, Argentina and Brazil.

The Company has significant influence over Neltume Ports due to its 40 per cent interest and other provisions in the shareholders agreement. As such, the Company accounts for its investment using the equity method of accounting, whereby the initial investment of \$471 million shall be adjusted for the Company's share of Neltume Ports' earnings, other comprehensive income, dividends received from Neltume Ports, and foreign exchange.

The equity interest in Neltume Ports is reported as a separate operating segment (see Note 3).

The summarized financial information for Neltume Ports is provided below. This includes the balance sheets and selected information from the statements of earnings and comprehensive income.

	December 31 2020	December 31 2019
Balance sheet		
Cash and cash equivalents	307	322
Other current assets	63	78
Current assets	370	400
Non-current assets	1,180	1,186
Total assets	1,550	1,586
Financial liabilities ⁽¹⁾	(53)	(48)
Other current liabilities	(45)	(57)
Current liabilities	(98)	(105)
Financial liabilities ⁽¹⁾	(197)	(215)
Other non-current liabilities	(104)	(95)
Non-current liabilities	(301)	(310)
Total liabilities	(399)	(415)
Net assets	1,151	1,171
ATCO's share of net assets	460	468

(1) Financial liabilities are comprised mainly of long-term debt.

	2020	2019
Selected information from the statement of earnings and comprehensive income		
Revenues	326	328
Depreciation and amortization	(65)	(62)
Interest income	2	8
Interest expense	(13)	(14)
Income taxes	(4)	(2)
Earnings	40	37
Other comprehensive loss	(5)	(6)
ATCO's share of earnings	15	15
ATCO's share of other comprehensive loss	(2)	(2)

A reconciliation of the carrying amount of the investment in associate company is as follows:

	2020	2019
Balance at the beginning of the year	468	491
ATCO's share of net earnings	15	15
ATCO's share of other comprehensive loss	(2)	(2)
Dividends received	(17)	(12)
Foreign exchange	(3)	(24)
Other	(1)	–
Balance at the end of the year	460	468

25. SUBSIDIARIES

Principal operating subsidiaries are listed below. Subsidiaries are wholly owned, unless otherwise indicated.

Principal Operating Subsidiaries	Principal Place of Business	Principal Activity
Subsidiaries at December 31, 2020 and December 31, 2019		
ATCO Structures & Logistics	Canada	Workforce housing, modular facilities, construction, site support services and logistics and operations management.
Inversiones ATCO Chile Limitada	Chile	Holds 40% investment in associate, Neltume Ports S.A.
Canadian Utilities Limited ⁽¹⁾	Canada	Holding company
ATCO Energy Solutions	Canada	Develops, owns and operates non-regulated energy and water-related infrastructure
Electricidad del Golfo	Mexico	Electricity generation and related infrastructure services
ATCO Gas Australia	Australia	Natural gas distribution
ATCO Power Australia	Australia	Electricity generation
ATCO Energy	Canada	Electricity and natural gas retailer
ATCO Power (2010) ⁽²⁾	Canada	Electricity generation and related infrastructure services
CU Inc.	Canada	Holding company
ATCO Electric	Canada	Electricity transmission, distribution and related infrastructure development
ATCO Gas	Canada	Natural gas distribution and related infrastructure development
ATCO Pipelines	Canada	Natural gas transmission and related infrastructure development
Subsidiaries sold during the year ended December 31, 2019 (see Note 23)		
ATCO Power Canada ⁽³⁾	Canada	Electricity generation and related infrastructure services
Alberta PowerLine ⁽⁴⁾	Canada	Design, build, own, and operate transmission infrastructure

(1) At December 31, 2020, ATCO Ltd. has an ownership interest of 52.3 per cent (2019 - 52.2 per cent).

(2) Following the sale of the Canadian fossil fuel-based electricity generation business (see Note 23), ATCO Power (2010) holds the remaining Canadian electricity generation and related infrastructure assets.

(3) Included the Canadian fossil fuel-based electricity generation business sold in 2019 (see Note 23).

(4) Prior to the sale of operations in 2019, Canadian Utilities Limited had an ownership interest of 80 per cent.

26. JOINT ARRANGEMENTS

JOINT OPERATIONS

In 2019, the Company disposed of its significant joint operations as part of the sale of the Canadian fossil fuel-based electricity generation business (see Note 23). Prior to the sale, the significant joint operations, all of which were included in the Energy Infrastructure segment, were as follows.

Significant Joint Operations	Operating Jurisdiction	Ownership %	Principal Activity
Sheerness Generating Plant	Canada	50	Electricity generation
Joffre Cogeneration Plant	Canada	40	Electricity generation
Cory Cogeneration Plant	Canada	50	Electricity generation
Muskeg River Cogeneration Plant	Canada	70	Electricity generation

JOINT VENTURES

The following joint ventures are considered the most significant; however, they are not individually material to the operations of the Company.

Significant Joint Ventures	Segment	Operating Jurisdiction	Ownership %	Principal Activity
Joint ventures at December 31, 2020 and December 31, 2019				
LUMA Energy LLC	Utilities, Electricity	Puerto Rico	50	Operations and management services
Osborne Cogeneration Plant	Electricity	Australia	50	Electricity generation
Strathcona Storage Limited Partnership	Pipelines & Liquids	Canada	60	Hydrocarbon storage
Joint venture at December 31, 2019, and during the period ended December 30, 2020				
Sabinco Soluciones Modulares S.A.	Structures & Logistics	Chile	50	Modular structures

Aggregate information for the Company's interest in joint ventures is shown below.

	2020	2019
Earnings and comprehensive income for the year	34	24
Dividends received	20	25
Aggregate carrying amount of interests in joint ventures	186	187

ATCO Sabinco

On December 30, 2020, the Company increased its ownership in Sabinco Soluciones Modulares S.A. (ATCO Sabinco) from 50 per cent to 100 per cent. The increase in ownership was accounted for using the acquisition method. The aggregate consideration paid was \$20 million and is included in other investing activities in the consolidated statements of cash flows. ATCO Sabinco was previously accounted for as a joint venture, and, effective December 30, 2020, is consolidated. Significant assets and liabilities acquired and, as a result included in the consolidated balance sheets at December 31, 2020, include \$43 million of property, plant and equipment, \$16 million of trade accounts receivable and contract assets, and \$11 million of long-term debt.

ATCO Sabinco is reported in the Structures & Logistics segment.

LUMA Energy LLC

On June 22, 2020, LUMA Energy LLC (LUMA), a Commonwealth of Puerto Rico based joint venture between the Company and Quanta Services, Inc., where each party holds a 50 per cent ownership interest, was selected by the Puerto Rico Public-Private Partnerships Authority to modernize and operate Puerto Rico's electric transmission and distribution system over a term of 15 years after a one year transition period which commenced in June 2020.

LUMA contractual arrangements do not assume ownership of any electric transmission and distribution assets. The functional currency of LUMA is US dollars.

The Company has accounted for its 50 per cent ownership interest as a joint venture, whereby the initial investment shall be adjusted for the Company's share of LUMA's earnings, other comprehensive income, dividends received from LUMA, and foreign exchange. When making the assessment on whether LUMA represents a joint venture, the Company considered the structure, legal form and contractual terms of the arrangement with Quanta Services, Inc., as well as other facts and circumstances.

LUMA is reported in the Utilities, Electricity segment.

At December 31, 2020, the investment in LUMA was \$14 million. Earnings from investment in LUMA during the year ended December 31, 2020, were \$14 million. No dividends or distributions were received from LUMA during the year ended December 31, 2020.

Joint venture disposed of as part of the sale of operations

In 2019, Canadian Utilities Limited disposed of its 50 per cent ownership in Brighton Beach Plant joint venture as part of the sale of the Canadian fossil fuel-based electricity generation business (see Note 23). Prior to the sale, Brighton Beach Plant was included in the Energy Infrastructure segment.

Investment in joint ventures

In 2020, contributions of \$9 million were made to the Strathcona Storage Limited Partnership (2019 - nil).

Commitments

The joint ventures have contractual obligations in the normal course of business. The Company's total share of these unrecognized commitments, based on the contractual undiscounted cash flows, was \$25 million at December 31, 2020 (2019 - \$45 million).

Restrictions

The Company requires approval from its joint venture partners before any dividends or distributions can be paid.

27. NON-CONTROLLING INTERESTS

Non-controlling interests at December 31 are as follows:

	2020	2019
NCI in Canadian Utilities Limited	3,794	3,853
NCI in ATCO Espaciomovil S.A.P.I. de C.V., 70 per cent owned subsidiary of ATCO Structures & Logistics	3	5
	3,797	3,858

NCI in CANADIAN UTILITIES LIMITED

Non-controlling interests in Canadian Utilities Limited at December 31 are as follows:

	2020	2019
Class A non-voting shares and Class B common shares	%	%
Total ownership interest held	47.7	47.8
Proportion of voting rights held	9.7	9.8
Proportion of non-voting rights held	61.7	61.8

The summarized consolidated financial information for Canadian Utilities Limited, before inter-company eliminations, is provided below.

	2020	2019
Consolidated Statements of Comprehensive Income		
Revenues	3,233	3,905
Earnings for the year	434	958

Perpetual Cumulative Second Preferred Shares					
Series V	25.00	0.2875	No premium	Currently redeemable	Not convertible

(1) Plus accrued and unpaid dividends.

(2) Cumulative, payable quarterly as and when declared by the Board.

(3) Dividend rate will reset on the date redeemable/convertible and every five years thereafter at a rate equal to the Government of Canada yield plus the reset premium noted.

(4) Redeemable by the Company or convertible by the holder on the date noted and every five years thereafter.

(5) If converted, holders will be entitled to receive quarterly floating rate dividends equal to the Government of Canada Treasury Bill yield plus the reset premium noted. Holders have the option to convert back to the original preferred shares series on subsequent redemption dates.

(6) Subject to a redemption premium of 4 per cent per share. The redemption premium declines by 1 per cent in each succeeding twelve month period from the redeemable date.

28. SHARE-BASED COMPENSATION PLANS

PLAN FEATURES

Share based forms of compensation are granted at the discretion of the Corporate Governance – Nomination, Compensation and Succession Committee. Plan features are described below.

Form of compensation	Eligibility	Vesting Period	Term	Settlement
Stock options ⁽¹⁾⁽²⁾	Officers and key employees	20% per year over 5 years	10 years	Class I Non-Voting Shares ⁽⁴⁾
		25% per year over 4 years	8 years	Class I Non-Voting Shares ⁽⁴⁾
Share appreciation rights ⁽¹⁾	Directors, officers and key employees	20% per year over 5 years	10 years	Cash
Mid-term incentive plan	Officers and key employees	2-3 years ⁽³⁾	2-3 years	Class I Non-Voting Shares ⁽⁵⁾

(1) Exercise price is equal to the weighted average of the trading price of the shares on the Toronto Stock Exchange for the five trading days immediately preceding the date of grant.

(2) Stock Options granted in 2020 vest over 4 years with a term of 8 years. Stock Options that were granted in 2019 and prior vest over 5 years with a term of 10 years.

(3) Based on achieving certain performance criteria.

(4) Issued from Treasury.

(5) Purchased on the secondary market.

STOCK OPTION PLAN

Information about the options outstanding and exercisable at December 31 is summarized below.

	2020		2019		
	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price	
Options authorized for grant	10,200,000		10,200,000		
Options available for issuance	1,994,950		2,444,540		
Outstanding options, beginning of year	693,000	\$44.40	705,500	\$41.31	
Granted	450,000	38.40	106,000	49.51	
Exercised	(27,300)	29.96	(107,950)	29.04	
Forfeited	(500)	42.08	(10,550)	45.92	
Outstanding options, end of year	1,115,200	\$42.33	693,000	\$44.40	
Options exercisable, end of year	461,950	\$44.44	397,850	\$43.21	
Options	Outstanding		Exercisable		
Range of Exercise Prices	Number Outstanding	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
\$28.32	9,000	0.2	\$28.32	9,000	\$28.32
\$35.12 - \$38.93	584,900	7.0	38.15	119,100	37.08
\$40.38 - \$44.97	176,050	5.1	43.26	113,500	43.93
\$45.40 - \$49.51	269,750	6.8	48.60	146,650	48.03
\$50.33 - \$51.97	75,500	3.4	51.89	73,700	51.91
\$28.32 - \$51.97	1,115,200	6.3	\$42.33	461,950	\$44.44

Compensation expense related to stock options was less than \$1 million in each of 2020 and 2019, with a corresponding increase to contributed surplus.

SHARE APPRECIATION RIGHTS

Information about the share appreciation rights (SARs) outstanding and exercisable at December 31 is summarized below.

	2020		2019		
	SARs	Weighted Average Exercise Price	SARs	Weighted Average Exercise Price	
Outstanding SARs, beginning of year	775,000	\$44.56	787,500	\$41.76	
Granted	7,000	38.40	127,000	49.51	
Exercised	(27,300)	29.96	(107,950)	29.04	
Forfeited	(18,500)	46.79	(31,550)	47.51	
Outstanding SARs, end of year	736,200	\$44.99	775,000	\$44.56	
SARs exercisable, end of year	461,950	\$44.44	397,850	\$43.21	
SARs	Outstanding		Exercisable		
Range of Exercise Prices	Number Outstanding	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
\$28.32	9,000	0.2	\$28.32	9,000	\$28.32
\$35.12 - \$38.93	148,900	3.9	37.43	119,100	37.08
\$40.38 - \$44.97	199,050	5.4	43.15	113,500	43.93
\$45.40 - \$49.51	301,750	6.9	48.67	146,650	48.03
\$50.33 - \$51.97	77,500	3.5	51.86	73,700	51.91
\$28.32 - \$51.97	736,200	5.4	\$44.99	461,950	\$44.44

In 2020, compensation credit related to SARs was a credit of \$1 million (2019 - expense of \$3 million). The total carrying value of liabilities arising from SARs at December 31, 2020 was \$2 million (2019 - \$3 million). The total intrinsic value of all vested SARs at December 31, 2020 was less than \$1 million (2019 - \$3 million).

STOCK OPTION AND SARs WEIGHTED AVERAGE ASSUMPTIONS

The Company uses the Black-Scholes option pricing model to estimate the weighted average fair value of the stock options and SARs granted. The following weighted average assumptions were used:

	2020		2019	
	Options	SARs	Options	SARs
Class I share price	\$38.40	\$38.40	\$49.51	\$49.51
Risk-free interest rate	0.52 %	0.37 %	1.47 %	1.47 %
Share price volatility ⁽¹⁾	21.76 %	24.67 %	18.88 %	18.85 %
Estimated annual Class I share dividend	4.62 %	4.62 %	3.25 %	3.25 %
Expected holding period prior to exercise	7.1 years	4.0 years	7.1 years	5.9 years

(1) The share price volatility is based on historical data and reflects the assumption that historical volatility over a period similar to the life of the option or SAR is indicative of future trends, which may not necessarily be indicative of exercise patterns that may occur.

MID-TERM INCENTIVE PLAN

Information about the MTIPs outstanding at December 31 is summarized below.

	2020		2019	
	MTIPs	Weighted Average Grant Date Fair Value	MTIPs	Weighted Average Grant Date Fair Value
Outstanding MTIPs, beginning of year	321,948	\$45.00	342,212	\$44.34
Granted	-	-	108,650	44.46
Vested	(78,401)	49.21	(28,770)	42.62
Forfeited ⁽¹⁾	(224,799)	43.49	(48,558)	41.77
Change in unallocated shares ⁽²⁾	225,461	-	(51,586)	-
Outstanding MTIPs, end of year	244,209	\$42.16	321,948	\$45.00

(1) Forfeitures occur when certain performance criteria are not met.

(2) Unallocated shares are Class I Shares held by the trustee which have not been awarded to officers or key employees.

MTIPs	Outstanding		
	Number Outstanding	Weighted Average Remaining Contractual Life	Weighted Average Grant Date Fair Value
Range of Prices			
\$40.92 - \$44.38	12,950	0.6	\$42.16
Unallocated shares	231,259	-	-
\$40.92 - \$44.38	244,209	0.6	\$42.16

Compensation expense related to MTIP grants was a credit of \$3 million for 2020 with a corresponding decrease to contributed surplus (2019 - expense of \$2 million with a corresponding increase to contributed surplus).

The Company, through a trustee, did not purchase any shares during 2020 to be distributed to employees on vesting of the awards (2019 - 10,000 shares).

29. CONTINGENCIES

Measurement inaccuracies occur from time to time on electricity and gas metering facilities. The measurement adjustments relating to the Canadian utilities are settled between the parties according to the Electricity and Gas Inspections Act (Canada) and related regulations. The AUC may disallow recovery of a measurement adjustment if it finds that controls and timely follow-up are inadequate. The measurement adjustments relating to ATCO Gas Australia are reconciled by the market operator and settled between the parties. Recovery of the costs is via a predetermined allowance contained in the current Access Arrangement.

The Company is party to a number of other disputes and lawsuits in the normal course of business. The Company believes that the ultimate liability arising from these matters will have no material impact on the consolidated financial statements.

In 2004, ATCO Gas and ATCO Electric transferred their retail energy supply businesses to Direct Energy. The legal obligations of ATCO Gas and ATCO Electric for the retail functions transferred to Direct Energy, which include the supply of natural gas and electricity to customers as well as billing and customer care, remain if Direct Energy fails to perform. In certain circumstances, the functions will revert to ATCO Gas and/or ATCO Electric, with no refund of the transfer proceeds to Direct Energy.

Prior to and as at December 31, 2020, Centrica plc., Direct Energy's parent company, provided a \$300 million guarantee, supported by a \$235 million letter of credit for Direct Energy's obligations to ATCO Gas and ATCO Electric under the transaction agreements. However, there can be no assurance that the coverage under these agreements will be adequate to defray all costs that could arise if the obligations are not met.

On January 5, 2021, Centrica plc. closed a transaction to sell its entire ownership interest in Direct Energy to NRG Energy Inc. (NRG). Effective January 5, 2021, NRG provided a \$300 million guarantee, supported by a \$300 million letter of credit for Direct Energy's obligations to ATCO Gas and ATCO Electric under the transaction agreements.

30. COMMITMENTS

In addition to commitments disclosed elsewhere in these financial statements, the Company has entered into a number of operating and maintenance agreements and agreements to purchase capital assets. Approximate future undiscounted payments under these agreements are as follows:

	2021	2022	2023	2024	2025	2026 and thereafter
Purchase obligations:						
Operating and maintenance agreements	407	319	329	299	47	151
Capital expenditures	231	-	-	-	-	-
Other	14	-	-	-	-	-
	652	319	329	299	47	151

31. RELATED PARTY TRANSACTIONS

In transactions with the Company's joint ventures, the Company recognized revenues of \$21 million relating to management fees and other charges (2019 - \$6 million).

In transactions with the Company's group pension plans, the Company paid occupancy costs of \$7 million relating to property owned by the pension plans (2019 - \$8 million).

The Company received less than \$1 million (2019 - less than \$1 million) in electricity and gas sales revenue and incurred \$1 million in advertising, promotion and other expenses from entities related through common control (2019 - \$3 million).

KEY MANAGEMENT COMPENSATION

Information on management compensation for the year ended December 31 is shown below.

	2020	2019
Salaries and short-term employee benefits	10	11
Retirement benefits	2	2
Share-based compensation ⁽¹⁾	(3)	8
	9	21

(1) In 2020, relates to certain forfeitures of mid-term incentive plan grants.

Key management personnel comprise members of executive management and the Board, a total of 18 individuals (2019 - 19 individuals).

32. ACCOUNTING POLICIES

PRINCIPLES OF CONSOLIDATION

Subsidiaries are consolidated from the date control is obtained until the date control ends. Control exists where the Company has power over the investee, exposure or rights to variable returns from the investee and the ability to use its power over the investee to affect returns.

All intra-group balances and transactions are eliminated on consolidation.

Interests in subsidiaries owned by other parties are included in NCI. NCI in subsidiaries are identified separately from equity attributable to Class I and Class II owners of the Company. Earnings and each component of OCI are attributed to the Class I and Class II owners of the Company and to NCI, even if this results in the NCI having a deficit balance. Earnings attributable to the Class I and Class II owners are determined after adjusting for dividends on equity preferred shares held by NCI.

Changes in the Company's ownership interests that do not result in a loss of control are accounted for as equity transactions. The carrying amounts of the Company's interest and the NCI are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the NCI are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the Class I and Class II owners of the Company.

ASSOCIATES

Associates are those entities over which the Company has significant influence, but not control or joint control, over the financial and operating policies. This is generally the case where the group holds between 20% and 50% of the voting rights.

Associates are equity accounted. Under this method, the Company's interests in associates are initially recognized at cost. The interests are subsequently adjusted to recognize the Company's share of post-acquisition profits or losses, movements in OCI and dividends or distributions received.

The Company's interests in associates are tested for recoverability when events or circumstances indicate a possible impairment. An impairment loss is recognized in earnings when the carrying value of the Company's interest in an individual associate is higher than its recoverable amount. The recoverable amount is the higher of fair value less disposal costs and value in use. An impairment loss may be reversed if there is objective evidence that a change in the estimated recoverable amount of the investment is warranted.

JOINT ARRANGEMENTS

A joint arrangement can be classified as either a joint operation or joint venture and represents the contractually agreed sharing of control by two or more parties. A joint operation is an arrangement in which the Company has the rights and obligations to the corresponding assets and liabilities of the arrangement, whereas a joint venture is an arrangement in which the Company has the rights to the net assets of the arrangement.

Joint operations are proportionately consolidated by including the Company's share of assets, liabilities, revenues, expenses and OCI in the respective consolidated accounts.

Joint ventures are equity accounted. Under this method, the Company's interests in joint ventures are initially recognized at cost. The interests are subsequently adjusted to recognize the Company's share of post-acquisition profits or losses, movements in OCI and dividends or distributions received.

The Company's interests in joint ventures are tested for recoverability when events or circumstances indicate a possible impairment. An impairment loss is recognized in earnings when the carrying value of the Company's interest in an individual joint venture is higher than its recoverable amount. The recoverable amount is the higher of fair value less disposal costs and value in use. An impairment loss may be reversed if there is objective evidence that a change in the estimated recoverable amount of the investment is warranted.

BUSINESS COMBINATIONS

Business combinations are accounted for using the acquisition method. Assets acquired and liabilities assumed are measured at their fair value at the acquisition date. Acquisition costs are expensed in the period incurred.

SERVICE CONCESSION ARRANGEMENTS

Service concession arrangements are contracts between the Company and government entities and can involve the design, build, finance, operation and maintenance of public infrastructure in which the government entity controls:

- (i) the services provided by the Company; and
- (ii) a significant residual interest in the infrastructure.

Service concession arrangements are classified as either a financial asset or an intangible asset, or both. A financial asset is recognized when the Company has an unconditional right to receive a specified amount of cash or other financial asset over the life of the arrangement. The financial asset is measured at the fair value of consideration received or receivable upon initial recognition. When the Company delivers more than one category of activity in a service concession arrangement, the consideration received or receivable is allocated by reference to the relative fair value of the activity, when amounts are separately identifiable. The Company recognizes an intangible asset when it has a right to charge for usage of the public infrastructure. The intangible asset is measured at fair value upon initial recognition. Subsequent to initial recognition, both the financial and intangible assets are measured at cost less accumulated amortization and impairment losses, if any.

REVENUE RECOGNITION

Revenue is allocated to the respective performance obligations based on relative transaction prices, and is recognized as goods and services are delivered to the customer. Revenue is measured as the amount of consideration expected to be received in exchange for the goods transferred or services delivered. The amount of revenue recognized reflects the time value of money where a significant financing component has been identified.

Contract modifications are accounted for prospectively or as a cumulative catch-up adjustment depending on the nature of the change.

Where the amount of goods and services delivered to the customer corresponds directly to the amount invoiced, the Company recognizes revenue equal to what it has the right to invoice.

Where the Company arranges for another party to provide a specified good or service (that is, it does not control the specified good or service provided by another party before that good or service is transferred to the customer), only revenues net of payments to the other party for the goods or services provided are recognized.

Non-cash considerations received from the Company's customers are included in the amount of revenue recognized and measured at fair value.

Costs incurred directly to obtain or fulfill a contract are capitalized and amortized to expense over the life of the contract.

Electricity generation and delivery

Revenue from independent power plant (IPP) contracts providing generation capacity to customers is recognized over the contract term and is measured based on fixed or variable capacity payments. Revenue from operating and maintaining the plant is recognized as the Company incurs costs to service the plant.

Electricity and natural gas transmission

Revenue from electricity and natural gas transmission services is recognized when service is provided to customers and is measured in proportion to the amount it has the right to invoice under the contract.

Customer contributions for extensions to plant are recognized as revenue over the life of the related asset.

Electricity and natural gas distribution

Revenue from distribution of electricity and natural gas is recognized when the services are provided to the customer based on metered consumption, which is adjusted periodically to reflect differences between estimated and actual consumption. Distribution of regulated and non-regulated electricity and natural gas is based on tariff-approved rates established by the Alberta Electric System Operator and Natural Gas Exchange and rates stipulated in the contracts, respectively. The Company recognizes revenue in an amount that corresponds directly with the services delivered and the amount invoiced.

Customer contributions for extensions to plant are recognized as revenue over the life of the related asset.

Gas storage and transportation

Revenue from hydrocarbon storage and transportation is recognized as the service is rendered to customers based on the length of the required service and contracted schedule of injections and withdrawals from the storage facilities.

Modular structures and related services

Revenue on manufactured modular structures is recognized upon delivery to or acceptance by the customer. Revenue from certain long-term contracts that relate to highly customized modular structures is recognized over time based on the costs incurred.

Lease revenue

Power purchase arrangements (PPA) for the generation of electricity are accounted for as operating leases, finance leases or executory contracts, depending on the terms of the PPAs.

Operating lease PPAs are subject to incentives and penalties relating to the generating unit's availability. Incentives are paid to the Company by the PPA counterparties for availability in excess of predetermined targets, whereas penalties are paid by the Company to the PPA counterparties when the availability targets are not achieved. The Company recognizes operating lease income on a declining rate base method, in accordance with the lease contract. Accumulated incentives in excess of accumulated penalties are deferred and operating lease income is recognized over the remaining term of the PPA. Conversely, any shortfall is expensed in the year the shortfall occurs.

Certain PPAs are classified as finance leases. Finance lease income is included in revenues. Non-lease components of the PPAs are accounted for based on the applicable performance obligations.

Service concession arrangement

Revenue on design and construction of the Fort McMurray 500 kV Transmission project (Project) was recognized based on the stage of completion of the related services. Revenue on operating and maintenance of the Project are recognized as related costs are incurred using the applicable markup.

Franchise fees

Municipal governments charge franchise fees to the utilities in Canada for the exclusive right to provide service in their community. These costs are charged to customers through rates approved by the regulator. Franchise fees do not represent a separate performance obligation to a customer and are recovered through utility transmission and distribution prices. The recovery is part of the provision of continuous electricity and natural gas transmission and distribution service performance obligation. Franchise fees invoiced to customers are recognized as revenues.

SHORT-TERM EMPLOYEE BENEFITS

Short-term employee benefits are recognized as an expense in salaries, wages and benefits as employees render service. These benefits include wages, salaries, social security contributions, short-term compensated absences, incentives and non-monetary benefits, such as medical care. Costs for employee services incurred in constructing

an asset that meet the asset recognition criteria are included in the related property, plant and equipment or intangible asset.

Termination benefits are recognized as an expense in salaries, wages and benefits at the earlier of when the Company can no longer withdraw the offer of those benefits and when the Company recognizes costs for a restructuring that includes the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer.

INCOME TAXES

Income taxes are the sum of current and deferred taxes. Income tax is recognized in earnings, except to the extent it relates to items recorded in OCI or in equity.

Current tax is calculated on taxable earnings using rates enacted or substantively enacted at the balance sheet date in the jurisdictions in which the Company operates.

The liability method is used to determine deferred income tax on temporary differences between the financial statement carrying amounts of assets and liabilities and their respective tax bases. Deferred income tax is calculated using the enacted or substantively enacted tax rates that are expected to apply in the period when the liability is settled or the asset is realized. If expected tax rates change, deferred income taxes are adjusted to the new rates.

Deferred income tax assets and liabilities are not recognized if the temporary differences arise from the initial recognition of goodwill or of other assets and liabilities in a transaction, other than a business combination, that does not affect accounting or taxable earnings. The tax effect of temporary differences from investments in subsidiaries and joint arrangements are not accounted for where the Company is able to control the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future. Deferred income tax assets are recognized only when it is probable that future taxable earnings will be available against which the temporary differences can be applied.

Current income tax assets and liabilities are offset where the Company has the legally enforceable right to offset and the Company intends to either settle on a net basis or realize the asset and settle the liability simultaneously.

Deferred income tax assets and liabilities are offset where the Company has a legally enforceable right to set off tax assets and liabilities, and when the deferred income tax assets and liabilities relate to income taxes levied by the same tax authority.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of cash at bank, bankers' acceptances, certificates of deposit issued or guaranteed by credit worthy financial institutions and federal government issued short-term investments with maturities generally of 90 days or less at purchase.

INVENTORIES

Inventories are valued at the lower of cost or net realizable value. The cost of inventories that are interchangeable is assigned using the weighted average cost method. For inventories that are not interchangeable, cost is assigned using specific identification of their individual costs. Net realizable value is the estimated selling price in the ordinary course of business, less variable selling expenses.

The cost of inventories is comprised of all purchase, conversion and other costs to bring inventories to their present condition and location. Purchase costs consist of the purchase price, import duties, non-recoverable taxes, transport, handling and other costs directly attributable to the purchase of finished goods, materials or services. Conversion costs include direct material and labour costs and a systematic allocation of fixed and variable overheads incurred in converting materials into finished goods. The standard cost method is used to approximate cost in the Company's Structures & Logistics manufacturing operations.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are recorded at cost less accumulated depreciation and any recognized impairment losses. Cost includes expenditures that are directly attributable to the purchase or construction of the asset, such as

materials, labour, borrowing costs incurred during construction, contracted services and asset retirement costs. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset only when it is probable that future economic benefits will flow to the Company and the cost can be measured reliably.

Major overhaul costs are capitalized and depreciated on a straight-line basis over the period to the next major overhaul, which varies from three to eight years. The cost of repair and maintenance activities performed every two years or less which do not enhance or extend the useful life of the asset are expensed when incurred.

Borrowing costs attributable to a construction period of substantial duration are added to the cost of the asset. The effective interest method is used to calculate capitalized interest using specified rates for specific borrowings and a weighted average rate for general borrowings. Interest capitalization starts when borrowing costs and expenditures are incurred at the onset of construction and ends when construction is substantially complete.

The Company allocates the amount initially recognized in property, plant and equipment to its significant components and depreciates each component separately. Assets are depreciated mainly on a straight-line basis over their estimated useful lives. No depreciation is provided on land and construction work-in-progress.

The carrying amount of a replaced asset is derecognized when the cost of replacing the asset is capitalized. When an asset is derecognized, any resulting gain or loss is recorded in earnings.

Depreciation periods for the principal categories of property, plant and equipment are shown in the table below.

	Useful Life	Average Useful Life	Average Depreciation Rate
Utility transmission and distribution:			
Electricity transmission equipment	2 to 65 years	51 years	1.9 %
Electricity distribution equipment	10 to 103 years	44 years	2.3 %
Gas transmission equipment	4 to 57 years	42 years	2.4 %
Gas distribution plant and equipment	3 to 120 years	41 years	2.4 %
Power generation plant and equipment:			
Gas-fired	15 years	15 years	6.4 %
Hydroelectric	43 to 50 years	50 years	1.9 %
Buildings	10 to 73 years	34 years	2.9 %
Other:			
Rental assets	12 to 17 years	17 years	6.0 %
Other plant, equipment and machinery	1 to 74 years	17 years	6.0 %

Depreciation methods and the estimated residual values and useful lives of assets are reviewed on an annual basis. Any changes in these accounting estimates are recorded prospectively.

INTANGIBLES

Intangible assets are recorded at cost less accumulated amortization and any recognized impairment losses. The Company amortizes intangible assets on a straight-line basis over their useful lives. Useful life is not longer than 10 years for computer software and between 74 and 80 years for land rights based on the contractual life of the underlying agreements. Software work-in-progress is not amortized as the software is not available for use.

Amortization methods and useful lives of assets are reviewed annually. Any changes in these accounting estimates are recorded prospectively.

IMPAIRMENT OF PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLES

Property, plant and equipment and intangible assets with finite lives are tested for recoverability when events or circumstances indicate a possible impairment. Impairment is assessed at the CGU level, which is the smallest identifiable group of assets that generates independent cash inflows. An impairment loss is recognized in earnings when the CGU's carrying value is higher than its recoverable amount. The recoverable amount is the greater of the CGU's fair value less disposal costs and its value in use. An impairment loss may be reversed in whole or in part if there is objective evidence that a change in the estimated recoverable amount is warranted. A reversal of an impairment loss shall not exceed the carrying amount that would have been determined (net of depreciation) had no impairment loss been recognized for the asset in prior years.

GOODWILL

Goodwill is not amortized. The carrying value of goodwill is tested for impairment annually or more frequently if there is an indicator of impairment. Impairment is tested at the operating segment level. If the carrying value of the segment to which goodwill has been assigned exceeds its recoverable amount, then any excess of the carrying value of a segment's goodwill over its recoverable amount is expensed and is not subsequently reversed.

LEASES

The Company as a lessee

At the inception of a contract, the Company assesses whether the contract is, or contains, a lease based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

A right-of-use asset representing the right to use the underlying asset with a corresponding lease liability is recognized when the leased asset becomes available for use by the Company.

The right-of-use asset is recognized at cost and is depreciated on a straight-line basis over the shorter of the estimated useful life of the asset and the lease term on a straight-line basis. The cost of the right-of-use asset is based on the following:

- the amount of initial recognition of related lease liability;
- adjusted by any lease payments made on or before inception of the lease;
- increased by any initial direct costs incurred; and
- decreased by lease incentives received and any costs to dismantle the leased asset.

The lease term includes consideration of an option to extend or to terminate if the Company is reasonably certain to exercise that option. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

Lease liabilities are initially recognized at the present value of the lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate. Subsequent to recognition, lease liabilities are measured at amortized cost using the effective interest rate method. Lease liabilities are remeasured when there is a change in future lease payments arising mainly from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, renewal or termination option.

The payments related to short-term leases and low-value leases are recognized as other expenses over the lease term in the consolidated statements of earnings.

The Company as a lessor

A finance lease exists when the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the leased asset to the lessee. Amounts due from lessees under finance leases are recorded as finance lease receivables. They are initially recognized at amounts equal to the present value of the minimum lease payments receivable. Payments that are part of the leasing arrangement are divided between a reduction in the finance lease receivable and finance lease income. Finance lease income is recognized so as to produce a constant rate of return on the Company's investment in the lease and is included in revenues.

ASSETS AND LIABILITIES OF DISPOSAL GROUPS CLASSIFIED AS HELD FOR SALE

Assets and liabilities of disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction. They are measured at the lower of their carrying value and fair value less costs to sell, except for deferred tax assets, assets arising from employee benefits and financial assets and liabilities that are carried at fair value.

Assets held for sale are not depreciated or amortized while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognized.

PROVISIONS

The Company recognizes provisions when:

- (i) there is a current legal or constructive obligation as a result of a past event;
- (ii) a probable outflow of economic benefits will be required to settle the obligation; and
- (iii) a reliable estimate of the obligation can be made.

Current legal or constructive obligations arising from onerous contracts are recognized as provisions when the unavoidable cost of meeting the obligation under the contract exceeds the economic benefits expected to be received.

If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. If discounting is used, the increase in the provision due to the passage of time is recognized in interest expense.

CONTINGENCIES

A contingent liability is a possible obligation, and a contingent asset is a possible asset, that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. A contingent liability may also be a present obligation that arises from past events that is not recognized because it is not probable that an outflow of economic resources will be required to settle the obligation or the amount of the obligation cannot be measured reliably.

Neither contingent liabilities nor assets are recognized in the consolidated financial statements. However, a contingent liability is disclosed, unless the possibility of an outflow of resources is remote. A contingent asset is only disclosed where an inflow of economic benefits is probable.

Management evaluates the likelihood of contingent events based on the probability of exposure to potential loss. Actual results could differ from these estimates.

ASSET RETIREMENT OBLIGATIONS

Asset retirement obligations (AROs) are legal and constructive obligations connected with the retirement of tangible long-lived assets. These obligations are measured at management's best estimate of the expenditure required to settle the obligation and are discounted to present value when the effect is material. Cash flows for AROs are adjusted to take risks and uncertainties into account and are discounted using a pre-tax, risk-free discount rate.

Initially, an ARO is recorded in provisions, included in other liabilities, with a corresponding increase to property, plant and equipment. Subsequently, the carrying amount of the provision is accreted over the estimated time period until the obligation is to be settled; the accretion expense is recognized as interest expense. The asset is depreciated over its estimated useful life. Revaluations of the ARO at each reporting period take into account changes in estimated future cash flows and the discount rate.

FINANCIAL INSTRUMENTS

The Company classifies financial assets when they are first recognized as amortized cost or fair value through profit or loss. Classification is determined based on the Company's business model for managing financial assets and the contractual cash flow characteristics of the financial assets. Financial assets are measured at amortized cost if the financial asset is:

- (i) held for the purpose of collecting contractual cash flows, and
- (ii) the contractual cash flows of the financial asset solely represent payments of principle and interest.

All other financial assets are classified as fair value through profit or loss.

Financial liabilities are classified as amortized cost or fair value through profit or loss.

Amortized cost

Financial instruments classified as amortized cost are initially measured at fair value and subsequently measured at their amortized cost using the effective interest method.

Fair value through profit or loss

Financial instruments classified as fair value through profit or loss are initially measured at fair value with subsequent changes in fair value recognized in earnings.

Transaction costs

Transaction costs directly attributable to the purchase or issue of financial assets or financial liabilities that are not classified as fair value through profit or loss are added to the fair value of such assets or liabilities when initially recognized. Transaction costs for long-term debt are amortized over the life of the respective financial liability using the effective interest method. The Company's long-term debt, non-recourse long-term debt and equity preferred shares are presented net of their respective transaction costs.

Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated balance sheet:

- (i) if there is a legally enforceable right to offset the recognized amounts, and
- (ii) if the Company intends either to settle on a net basis or to realize the assets and settle the liabilities simultaneously.

Derecognition of financial instruments

Financial assets are derecognized:

- (i) when the right to receive cash flows from the financial assets has expired or been transferred, and
- (ii) the Company has transferred substantially all the risks and rewards of ownership.

Financial liabilities are derecognized when the obligation is discharged, cancelled, or expired.

Fair value hierarchy

The Company uses quoted market prices when available to estimate fair value. Models incorporating observable market data, along with transaction specific factors, are also used to estimate fair value. Financial assets and liabilities are classified in the fair value hierarchy according to the lowest level of input that is significant to the fair value measurement. Management's judgment as to the significance of a particular input may affect placement within the fair value hierarchy levels.

The hierarchy is as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company applies settlement date accounting to the purchases and sales of financial assets. Settlement date accounting means recognizing an asset on the day it is received by the Company and recognizing the disposal of an asset on the day it is delivered by the Company. Any gain or loss on disposal is also recognized on that day.

IMPAIRMENT OF FINANCIAL INSTRUMENTS

At each reporting date, the Company assesses whether there is evidence that a financial asset or group of financial assets is impaired. If such evidence exists, an impairment loss is recognized in earnings.

Impairment losses on financial assets carried at amortized cost are calculated as the difference between the amortized cost and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. Impairment losses on financial assets carried at amortized cost may be reversed in whole or in part if there is evidence that a change in the estimated recoverable amount is warranted. The revised recoverable amount cannot exceed the carrying amount that would have been determined had no impairment charge been recognized in previous periods.

The Company applies the expected credit loss allowance matrix based on historical credit loss experience, aging of financial assets, default probabilities, forward-looking information specific to the counterparty, and industry-specific economic outlooks.

For accounts receivable and contract assets and finance lease receivables, the Company estimates credit loss allowances at initial recognition and throughout the life of the receivable. For receivable under service concession arrangement, the Company estimates credit loss allowances from possible default events within the twelve months after the balance sheet date.

DERIVATIVE FINANCIAL INSTRUMENTS

Contracts settled net in cash or in another financial asset are classified as derivatives, unless they meet the Company's own use requirements.

All derivative financial instruments are measured at fair value. The gain or loss that results from changes in fair value of the derivative is recognized in earnings immediately, unless the derivative is designated and effective as a hedging instrument, in which case the timing of recognition in earnings depends on the hedging relationship.

Where the Company elects to apply hedge accounting, the Company documents the relationship between the derivative and the hedged item at inception of the hedge, based on the Company's risk management policies. A qualitative assessment of the effectiveness of the hedging relationship is performed at each reporting period if both the critical terms of the hedging relationship and the economic relationship between the hedged item and hedging instrument continue to remain the same or similar. If the mismatch in terms is significant, a quantitative assessment may be required. Ineffectiveness, if any, is measured at the end of each reporting period.

If the risk management hedge ratio used to form the economic relationship of the hedged item and hedging instrument changes, rebalancing of the hedging relationship is required. Under this circumstance, an adjustment to the quantities of the hedged item or hedging instrument would be allowed to realign the hedging relationship in accordance with the appropriate risk management hedge ratio. The Company can only discontinue hedge accounting prospectively if there is no longer an economic relationship between the hedged item and hedging instrument, the risk management objective changes, the derivative no longer is designated as a hedging instrument, or the underlying hedged item is derecognized.

Cash flow hedges

The Company enters into interest rate swaps, foreign currency forward contracts and natural gas and forward power purchase and sale contracts to offset the risk of volatility in the variable cash flows arising from a recognized asset or liability, a highly probable forecast transaction or a firm commitment in a foreign currency transaction. The effective portion of changes in fair value of the derivative is recognized in OCI, whereas the ineffective portion is recognized in earnings immediately. Sources of hedge ineffectiveness can occur as a result of credit risk, change in hedge ratio, changes in the timing of payment, and forecast adjustments leading to over-hedging. The cumulative gain or loss in AOCI is transferred to earnings when the hedged item affects earnings. If a forecast transaction results in the recognition of a non-financial asset or liability, the amount in AOCI is added to the initial cost of the non-financial asset or liability.

If the Company discontinues hedge accounting, the cumulative gain or loss in AOCI is transferred to earnings at the same time as the hedged item affects earnings.

The amount in AOCI is immediately transferred to earnings if the hedged item is derecognized or it is probable that a forecast transaction will not occur in the originally specified time frame.

RETIREMENT BENEFITS

The Company accrues for its obligations under defined benefit pension and OPEB plans.

Pension plan assets at the balance sheet date are reported at fair value. Accrued benefit obligations at the balance sheet date are determined using a discount rate that reflects market interest rates. The rates are equivalent to those on high quality corporate bonds that match the timing and amount of expected benefit payments.

The cost for defined benefit plans includes net interest expense. This expense is calculated by applying the discount rate to the net defined benefit asset or liability at the beginning of the year plus projected contributions and benefit payments during the year.

Gains and losses resulting from experience adjustments and changes in assumptions used to measure the accrued benefit obligations are recognized in OCI in the period in which they occur. Those gains and losses are then transferred directly to retained earnings.

Employer contributions to the defined contribution pension plans are expensed as employees render service.

For defined benefit pension plans and OPEB plans, service cost is recognized as an expense in salaries, wages and benefits, and net interest expense is recognized in interest expense. The cost of defined contribution pension plans is recognized as an expense in salaries, wages and benefits. Past service costs are recognized immediately in earnings in the period of a plan amendment or curtailment. The change in the present value of the defined benefit pension plans resulting from a curtailment is accounted for as a past service cost. When retirement benefit costs for employee services are incurred in constructing an asset and meet asset recognition criteria, they are included in the related property, plant and equipment or intangible asset.

SHARE-BASED COMPENSATION PLANS

The Company expenses stock options granted by ATCO Ltd. and its subsidiary, Canadian Utilities Limited. The Company determines the fair value of the options on the date of grant. The fair value is recognized over the vesting period of the options granted by applying graded vesting, adjusted for estimated forfeitures. The fair value of the ATCO Ltd. options is recorded in salaries, wages and benefits expense and contributed surplus. Contributed surplus is reduced as the ATCO Ltd. options are exercised, and the amount initially recorded in contributed surplus is credited to Class I and Class II Share capital. The fair value of the Canadian Utilities Limited options is recorded in salaries, wages and benefits expense and non-controlling interests.

SARs are cash-settled and are measured at fair value. The fair value is recognized over the vesting period of the SARs granted by applying graded vesting, adjusted for estimated forfeitures. The fair value of SARs is recorded in salaries, wages and benefits expense and accounts payable and accrued liabilities and other non-current liabilities. The liabilities are re-measured at each reporting period.

The MTIP awards are equity-settled with shares purchased on the secondary market. They are measured at fair value based on the purchase price of the Company's Class I Shares at the date of grant. The awards are held by a trust until the shares are vested, at which time they are transferred to the employee. The fair value of the MTIP awards is recognized in salaries, wages and benefits expense over the vesting period, with a corresponding charge to contributed surplus.

RELATED PARTY TRANSACTIONS

Transactions with related parties in the normal course of business are measured at the exchange amount. Transfers of assets or business combinations between entities under common control are measured at the carrying amount.

FOREIGN CURRENCY TRANSLATION

Foreign currency transactions

Transactions denominated in foreign currencies are translated at the exchange rate at the date of the transaction. Monetary assets and liabilities and non-monetary assets and liabilities measured at fair value denominated in a foreign currency are adjusted to reflect the exchange rate at the balance sheet date. Gains or losses on translation of these monetary and non-monetary items are recognized in earnings. Non-monetary items not measured at fair value are not retranslated after they are first recognized.

Foreign operations

The assets and liabilities of subsidiaries whose functional currencies are other than Canadian dollars are translated into Canadian dollars at the exchange rate at the balance sheet date. Revenues and expenses are translated at the average monthly exchange rates during the period, which approximates the foreign exchange rates on the dates of the transactions. Gains or losses on translation are included in OCI.

If the Company disposes of its entire interest in a foreign operation, or loses control, joint control, or significant influence over a foreign operation, the accumulated foreign currency translation gains or losses related to the foreign operation are recognized in earnings.

The exchange rates for the major currencies used in the preparation of the consolidated financial statements were as follows:

	Exchange Rates as at December 31		Average Exchange Rates for Year Ended December 31	
	2020	2019	2020	2019
U.S. dollar	1.2838	1.2963	1.3415	1.3281
Australian dollar	0.9726	0.9112	0.9247	0.9227

ACCOUNTING STANDARDS AND INTERPRETATIONS NOT YET ADOPTED

At December 31, 2020, there are no new or amended standards and interpretations that need to be adopted in future periods and will have a significant impact on the Company.
